

Auric Circuitry

This document addresses the key ratio and flow of the auric bodies through the 13-20-33 circuitry and the 13:20 Time shift. This is the ultimate resonance that allows for flow into your Crystalline Light Body. In order to achieve this high level of Auric layer activation, one must be consistent in discipline and comprehend the fundamental stipulations required for their sustenance. This is the process of unifying energy fields to our highest magnetic resonance, to break through to the higher electrical currents of existence.

There is a spiritual nature to all things that includes our auric energy fields. It is interwoven with consciousness and we are designed to bring spiritual current into our fields. Think of it like this... If an electrical circuit is grounding out, you can apply as much voltage as you want, but it is not achieving anything. It is not lighting your lights or heating your toaster. It is just going into the ground. And if someone's spiritual current is grounding out in random, meaningless, unfocused ways, the voltage of Universal Love is of no avail.

The Crystal Body remains mostly dormant in humans until consciousness growth stages of heart opening actually occur in the 8th Chakra center during the monadic integration phase. In the dormant phase, an individual's DNA remains spiritually stagnant and is therefore largely being shaped through epigenetic exposures or environmental factors. In many cases, the negative ego programs of over mentalized intellectualization directly block communication exchanges from the heart center into the Crystal Body. Hence the aggressive trauma-based mind control targeting used by the Controllers as the main spiritual warfare tactic to keep humanity in fear for the purpose of shutting down their higher heart center, which tends to result as inactivity within the Crystal Body.

Activation of the Crystal Body starts with opening our heart center towards feeling and experiencing more loving kindness, compassion and empathy for ourselves and others, which naturally occurs during the first stages of spiritual awakening. After the heart center is able to feel and express unconditional love, the next stages of Crystal Body activation come from assorted ascension wave transmissions from the Sun or stellar bodies into the planetary grid, which include a variety of light symbol codes.

As of Summer Solstice, we are in an ascension wave in which solar plasma frequencies are being saturated through the planetary grid network to assist in monadic matrix integration for Crystal Body activation, which further leads to an acceleration in DNA assembly. This is the generation of internal union crystalline blueprints in the individual Crystal Body that further activate the crystal gene in the silicate matrix which then catalyzes a range of bio-spiritual plasmas.

The acute phase of correcting magnetic realignment via reconnection with crystal body instruction sets is occurring within the window of the Solar Eclipse of June 10th through the March Equinox in 2023. If these physical symptoms are not present now, they may arise in the next nine months for the consciousness rebirthing necessary for preparing to navigate the planetary liberation and ascension timeline in 2023 and beyond. The Circuitry of 13-20-33 is a profound step on your way to greater reality and Divinity Consciousness.

KEY CONCEPT 1: The ascension energies are continually stretching your frequential capacities. This process requires you to grow a new expanded auric field, much like a snake that annually outgrows its skin, and goes through a phase of fitting into a new one that can better encompass the larger body.

KEY CONCEPT 2: The blue diamond crystal is the geometry of your luminous multi-dimensional mental body and home to the purity of your fifth dimensional blue heart star. This is the connection and integration from this dimension to the fifth dimension.

KEY CONCEPT 3: It is through the green octahedral matrix that your physical form is evolving into a silica-based biology (crystalline). Your Earth Star modulates incoming higher dimensional frequential energies to create ease and reduce the painful symptoms of this difficult and physically taxing process. Your etheric auric body serves as a double terminated crystalline receiver, transmitter, and amplifier serving your entire monadic auric field.

You need to understand that the Mer-Ka-Bah is the descending light body and the Crystalline Mer-Ki-Va, is the transformation mechanism for the ascending light body to the 'New Earth Terra (5D). The Mer-Ki-Vic Tri-System is based on the emergence of the Crystalline Grid. This explains that the new light body is non-gendered and higher in dimensional currents that are non-polarized. Each dimension contains a unique perspective of geometry and physics, and in some of the higher realms are paradoxical, in that the geometry is formless. This is the Crystalline body through the Crystalline Grid that fully empowers our return to the 13-20-33 upshift into the re-emerging Crystalline, or non-polarity state.

This is a complete cycle process. This circuitry implements and administers the mandatory linkage between the 33 components of the integral field. It is the interval manifold that regulates the appropriate networking resonance and lattice-weave within and without. It is defined as follows: the 13 represents the 12 layers of the Auric Field within etheric matter harmonized and synchronized into Oneness. Thus the 12 become the One forming the $12+1=13$ frequency. It only occurs after sufficient sojourns in duality allow the consciousness of the entity to activate all 12 layers and activate the 12 primary chakras to each layer of the aura and the 12 strand DNA.

A similar process will happen at a much higher level with the 24 strand DNA activation resulting in 36 strands of DNA 39-60-99 circuitry. Think of this like our internet protocol (IP) address and it results in:

- increased brain capacity and expanded awareness
- cleared family and genetic karmic patterns
- greater clarity
- a strengthened immune system
- increased cellular vibration
- a greater opening for a connection to the Higher Self
- increased flows of kundalini energy
- awakened talents and spiritual abilities

In the initial sequence we begin with the 13-20-33 circuitry. The 20 represents activation of human auric interface layers into multidimensionality within the realms of AntiMatter. These layers were not easily accessible until the adjustment of the magnetic grid occurred. The synchronization of the 13 + the 20 enables the 33 circuitry. This enables the circuitry that allows for humanity to expand fully into the Crystalline, non polarity levels of consciousness.

The 13-20-33 is an energetic emulsion interface that combines the connectivity between anti-matter/matter and your etheric- matter (ethereal spirit) into a crystalline-electric amalgam that creates the energy frequency of OM. As such the circuitry of 13-20-33 is the not only the optimal frequential flow

required for full auric function and upshift, it is the only frequency that can do so. It is the key, that serves as the 'plug-in' for full power and carries immense energy. It untangles and combines variegated heterogeneous and homogenous energy forms in a compatible unified matrix that is capable of flowing into the zero point, Crystalline Field of Mer-Ki-Va resulting in the harmonic convergence.

The 13-20-33 circuitry is dependent on certain maintenance responsibilities to obtain and sustain optimal circuitry. The following are issues that hinder the auric and circuitry interfaces:

- Opposing Energy Fields that cause micro fractures in your auric fields
- Emotional Stress
- Depression
- Conflict
- Planetary Energy Expansion
- Thought Form Attachment
- Physical Over-Stress (Too much exercise)
- Medications such as painkillers, stimulants, benzodiazepines, Opioids, Anabolic steroids
- Alcoholism
- Inappropriate Attitude/Ego Imbalance
- Control Issues
- Interfering EM Fields & Microwaves Resulting in Bio-Polar Reversal
- Air Travel and Equatorial Crossings
- Mindlessness – reactive brain
- Auric diffusion by magnetics

We must transform this body to embody the ever higher vibrational fields and advanced abilities traditionally associated with Divinity. All the "clair" (clairvoyant, clairsentient etc.,) capacities spontaneously emerge as do seemingly miraculous or magical abilities such as shape-shifting, bi-location, and ultimately immortality. One vibrates at the frequencies of love, harmony and compassion.

HARMONIC CONVERGENCE AT 33
