

## OMICRON COMMONWEALTH IS A VISION OF THE FUTURE

If you fell in love with Star Trek's utopian vision that sought to inspire us to strive for a future where cooperation, exploration, and the pursuit of knowledge lead to a better world for all, then let us introduce you to Omicron Commonwealth.

Currently, our entire way of life is based on labor and capital, conflict, and inequalities that all come about because of the principle of finite resources; a monetary exchange system; nation's doling out the resources and using resources to manipulate others; one person has too much; and one person has too little, all constrained by the capitalism and scarcity-based economic models that currently serve us.

Imagine never going without a house, food, health care, education, or freedom. This goes one step further in imagining a future where collectivism triumphs, money is obsolete, and the basic needs of every individual is met. In other words, the acquisition of wealth is no longer the driving force in our lives. Instead, we work to better ourselves and the rest of humanity.

We must first understand that the most crucial elements of Omicron Commonwealth are the values and beliefs. Value does not mean monetary worth in this culture, but rather ideals, principles, and standards that members hold in high regard, as well as holding "knowledge" (education) in high regard. Values are deeply embedded and are critical for learning our beliefs, which are the tenets and convictions that we hold to be true.

Omicron Commonwealth is founded on the principles of liberty, equality, justice, progress, and peaceful coexistence, which is dedicated to the pursuit of knowledge and the universal enfranchisement of sentient life. It is a new world in which economic conditions allow each person to contribute to society according to their ability and consume according to the basic needs of all humans.

Omicron Commonwealth is based on a new economic environment, in which an individuals' value, the pursuit of societal good, self-improvement, and morality are what drive success and advancement of humanity, instead of monetary gain and debt. This concept is created on the absence of currency and revolves around a society where everything functions without the pricing mechanism and the results of eliminating money as both a unit of account and as an information signal because economic problems have been overcome, and money is meaningless.

We believe that humanity, rather than being doomed to self-destruct, is destined to evolve out of the construct of political myopia. Omicron Commonwealth advances a commitment to self-determination, independence, freedom, equality, individual rights, responsibility and creativity. It promotes a naturalistic universal-view, dedicated to using reason, science, and logic in understanding everything in the universe, by collectively solving problems, and improving the human condition. We accept universal ethical norms that transcend governments, politics, religion, and culture. These represent Omicron Commonwealth's humanist principles and ethics, absent of racism, sexism, and capitalism. This is fundamentally about the pursuit and achievement of equality for all human beings.

The Omicron Commonwealth Prime Directive and policies are philosophical beliefs that advocate the removal of social, economic, and political inequalities among human beings. It sees individuals as morally and fundamentally equal.

In order for this vision to succeed, ideas and philosophies have been created and evaluated on several different levels of thought to build forms that are both realistic and which embrace humanity's highest aspirations. The general principle is that there would be a massive thought transformation and healing of society in terms of its function and functionality. Social function would be tempered with endless creativity, stewardship, education, ingenuity, and inspiration. Society would not be built on 'utilitarian' lines, in the sense of people being pigeon-holed into the most financially profitable but emotionally profitless careers; instead everybody would be able to develop their capabilities and talents. In this society people would be able to fulfil roles at their level of abilities and values without ruling out their potential to completely live outside of the box!

We understand that economic inequality is a direct and global barrier to upward mobility and positive socioeconomic outcomes, perpetuating negative effects for individual and population health, well-being, and sustainability. Biases will always be a part of a monetary economic system.

To succeed, Omicron Commonwealth is designed to be a protopian (continuously improving) society, that advocates for equality in all aspects of life, including social, economic, and political spheres, set up into three diverse cultural groups for the purposes of diverse optimum value much like Star trek. The value, knowledge, and diversity across groups enhances creativity, innovation, empathy, and social cohesion.

The Guardian Class – (Diplomacy, Governance, and Knowledge) those individuals that are actively uniformed services that maintain the values, principal, and beliefs for governance, conducting space exploration, science and research, defense, peacekeeping, and diplomacy. They maintain the well-being of Omicron Commonwealth. They continue to acquire new knowledge and ensure all of humanity benefits from that knowledge.

The Empryeen Class - (Communication, Labor, and Service) those individuals that have strong, central ties to concentric (overlapping, yet distinct) philosophies, openness to new ideas, and embracing beauty and truth in the culinary services, family support, medical, entertainment, art, professional services, agricultural/horticultural, educational, and societal service structures of Omicron Commonwealth.

The Hellasian Class – (Innovation, Products, and Industrialization) those individuals that have strong central ties and roles to advance valuable strategic assets that involve sharing best practices and developing a rapid-response culture to create, assemble, control, produce, teach, process, and supply products as Builders, Fabricators, Inventors, Manufacturers, and Industrial applications.

If we are to build a world of inclusiveness, then we must be mindful of the execution, for it matters just as much as intention. Start building the future with us. Join Omicron Commonwealth today.
