

Political System Programs are the planning, preparation, implementation, execution, management, and administration of public policy, public governance, organizational resources, and regulatory affairs to meet strategic goals and Core Values through formal and informal activities.

The mechanisms and Platforms is the strategic eco system of governments and partnerships that emphasizes clarity, opportunities, proactive management, accountability, and agility to discovered or uncovered challenges that have to be resolved efficiently to ensure the longevity and success of partnerships or alliances, such as isolating proprietary knowledge, processing multiple knowledge flows, creating adaptive governance and operating global virtual teams.

The Collaboration and Coordination Management Programs are dimensional learning environments characterizing effective collaboration models on improving either processes or impact outcomes.

- Coordinated processes.* Stakeholders and Partners identify and share new operational processes that clarify, provide opportunities, account for, and benefit respective resources.
- Coordinated outcomes.* Stakeholders and Partners work together to define desired outcomes, create standardized metrics for measuring strategies and impacts, and benchmark performance.

Negotiations and Contracting Platforms clarify, proactively manage, and understand the key elements of contracts and best practices for creating, negotiating, and managing legally binding agreements that outline the expectations and obligations of all parties involved
