FORTY-TWO UNIVERSAL LAWS

The Universal Laws are the principles that govern the intelligent energy.

The Immutable Universal Laws also referred to as the “Equitable Laws of the Universe” are the unwavering and unchanging principles that govern every aspect of the universe and are the means by which our world and the entire cosmos continues to exist, thrive and expand.

The laws are necessary to allow all the processes of the universe to function. A hierarchy exists that determines the amount of information and processes that each law manages and the processes of the universe are manifested through two different and complementary forces known as Creation and Comprehension.

Universal Laws exist to provide order. It is important to know these laws because of their relevance to enlightenment and ascension. The Universal Laws consist of Superior laws from the time of Creation and Subordinate Laws that provide support to the physical world's perception of order and function.

CATEGORY I

We can observe in the vastness of our Universe that these laws govern the creation, principles, characteristics, aspects, and movement of all energy. There are, however, basic laws of life that ensure the preservation of energetic life, principles, and relationships. These laws are the rules (or patterns) that are applied to all life within the entire Universe and all that it contains. In the Third Dimension, the Basic Laws of Life include the subordinate laws of:

1. **Law of Chaos** - The Law of Chaos exists when the observing mind can NOT accept what is.
2. **Law of Order** - The Law of Order exists when the observing mind can accept what is, regardless of the appearance of chaos.
3. **Law of Love**-The foundation and command of the basic laws of life.
4. **Law of Harmony** – The activity of synthesis...building up formless into form without discord.
5. **Law of Desires** - Inherent in every intention is desire, which is the mechanics and organizing power for its fulfillment.
6. **Law of Truth**- The Law of Truth exists when out of chaos comes order.

These Basic Laws of Life can be placed into basic categories to cover the primary aspects and characteristics of spiritual, physical, and emotional actions and reactions.

Table of Contents

Law of Resistance **Error! Bookmark not defined.**

Law of Projection.....3

Law of Reflection.....4

Poem title by Author **Error! Bookmark not defined.**

Authors **Error! Bookmark not defined.**

1. **LAW OF RESISTANCE**

The Universal Law that resistance creates more resistance is one of the simplest Laws, and yet one of the most difficult for us, as humans, to incorporate into our pattern of thinking. A large portion of the manifestation process for achieving our desires depends upon the choices we make. One of the choices, in order to successfully manifest, is the choice to not resist the way in which the Universal Source fills our needs.

When we focus on something we are in effect calling it towards ourselves and into our lives, whether we want them or not. We invite situations, people, experiences, and even material things into our lives by way of our thoughts and beliefs. If we hold a belief or think a certain thought often enough, it becomes embedded into our conscious mind. Your subconscious mind can discriminate between a negative instruction and a positive one, but your conscious mind is fully engaged and cannot tell the difference.

2. **LAW OF PROJECTION**

The Law of Projection states that everything you see outside of yourself is but a projection created by you. Everything in your life is a direct result of your perceptions, beliefs, expectations, and thinking.

All aspects of ourselves and our personalities, our lives and lifestyle choices are projected outwards, and then reflected back to us. All that we perceive on the outside is a reflection of what is within; therefore all that we see on the outside is a projection of ourselves. The Law of Projection is precise, and can be a powerful form of denial; therefore remain mindful as to what you are projecting.

2. LAW OF PROJECTION CONTINUED

For example...if we bury hostility, but express it outwardly as passive anger or aggression, that hostility is projected onto those around us, and we will perceive that people are aggressive, whether they truly are or not. Those who project their own anger, hatred or rage (or any other negative emotion) will perceive and believe that everyone else is out to get them. We project our sexuality and insecurities onto others. If we are paranoid and judgmental of others' moralities, we are projecting our own underlying immorality.

If we believe that all around us are cheats, then we are projecting our own cheating tendencies. As a result, we may attract people who cheat into our lives. If we accuse our partner of being unfaithful, we are projecting our own lack of faith in the relationship.

All outward appearances of your world begin with your inward conditions. Your state of mind creates your perception of what you will see in your world and projects it out into your reality. Everything in this world is filtered through the eye of the beholder. If you see the world as happy it is because internally that is what is inside you. If you see the world filled with hostile people it is because internally that is what is inside you. Whatever it is you are feeling is projected on your screen of reality.

3. LAW OF REFLECTION

All aspects of ourselves are reflected back to us. All that we perceive outside self is a mirror of something within. Therefore, everything that we see outside is a 'projection'.

This Law states that the traits you respond to in others, you recognize in yourself, both positive and negative. It has four primary manifestations:

1. That which you admire in others, you recognize as existing within yourself;
2. That which you resist and react to strongly in others is sure to be found within yourself;
3. That which you resist and react to in others is something which you are afraid exists within you; and,
4. That which you resist in yourself, you will dislike in others.

In other words, you have chosen to incarnate upon the manifest plane to learn to rise above the effect of fear. Those fears will always be reflected in your reactions to others. Thus your goals are very obvious once you recognize how to perceive them. As you let go of the fear, you automatically open to expressing more unconditional love.

4. LAW OF ATTACHMENT

The Universal Law of Attachment teaches us that the most powerful way to release attachment is by visualization, intention and unconditional love for ourselves and others. Attachment is 'conditional love'. If we NEED someone to behave in a certain manner in order for us to love them then this is 'conditional love'. It is attachment.

In order to successfully attract something, you must be detached to the outcome. If you are attached, you project negative emotions of fear, doubt, or craving which actually attracts the opposite of your desire. To be attached means to be powerless because what you attach yourself to, you give your power to it. When you look to outside sources to bring you fulfillment, you are giving your power away. When you are looking to something outside yourself for power and happiness, you are making something other than your true self your source.

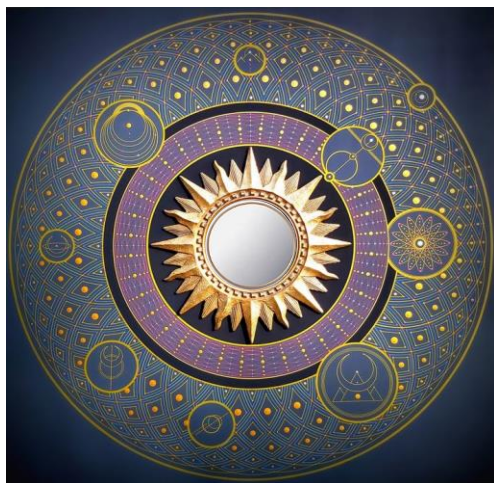

We can be attached to things and objects as well as other people. Negative energies such as pride, envy, greed, and need can form strong cords (or ties) to such objects as bank balances, occupations, houses, jewels and even cars.

Etheric cords are formed between people who have unresolved emotions and issues between them. Each and every time we send out negative thoughts or angry words of jealousy, envy, hurt or need towards someone, a tiny thread is manifested which attaches to them. This forms a bond or attachment. If we consistently send out these feelings and emotions, these tiny threads become cords or ropes that bind us.

4. LAW OF ATTACHMENT CONTINUED

These strong cords remain and bind us to the person we feel negatively towards. Unless these cords (or binds) are resolved, they will reactivate and inevitably draw towards us those with whom we have unresolved issues. This happens in order to enable us to re-face the lesson of forgiveness, and gives us the opportunity to do things differently.

Forgiveness and unconditional love dissolves cords and ties. Our souls and inner-selves want us to release all of our unresolved issues so that we are free to move forward upon our spiritual paths. When we forgive others and totally let go of what has occurred in the past we are able to free the other person, and most importantly, free ourselves.

5. LAW OF DYING

When a unit or entity has completed one stage or area of growth, it will gather all the knowledge from this area of growth and all the knowledge from the Group Soul of its element and withdraw this knowledge into itself, ready to expand into enlightenment.

There are numerous rhythms and routines that occur in the universe, from the movements of the planets to the cycles of earth's seasons, the ocean tides, economic cycles, and within our lives, from the cycle of birth, growth, maturity, and the transition back to spirit.

The act of dying is more than just a physical process. It is the transformation of energies from the physical plane to the spiritual plane. The energy of the Universe is always moving and transmuting into and out of form. The law of dying further tells us that energy is always in a state of motion. It will take one form, move to another form, but it's always in motion and never standing still. This law relates to the universe and our consciousness through the realization that everything seen and unseen is constantly changing and we are part of that change.

6. LAW OF CATASTROPHE

The Law of Catastrophe is referred to in the human experience as the stage of drama or trauma. An absolute necessity for the evolutionary process, motivated by many laws of totality, such as when the seed cracks and growth is permitted to begin. For the physical entity to achieve growth, it must evolve the positive aspects of any given drama or trauma. This occurs in the human experience and in nature. It is the quantization of energetic resistance and potentiality of positive and negative charges upon the numerous rhythms and cycles of nature. If enough negative potentiality is given to a natural process, then that process will convert the energies to the potentiality of a catastrophe before resuming the natural rhythms of the cycle. So whether the catastrophe constitutes a natural disaster such as hurricane, volcano, etc. or death, illness, and suffering from an unnatural disaster, in order for it to occur, the potentialities of chaos due to negative aspects must have been present in the cycle.

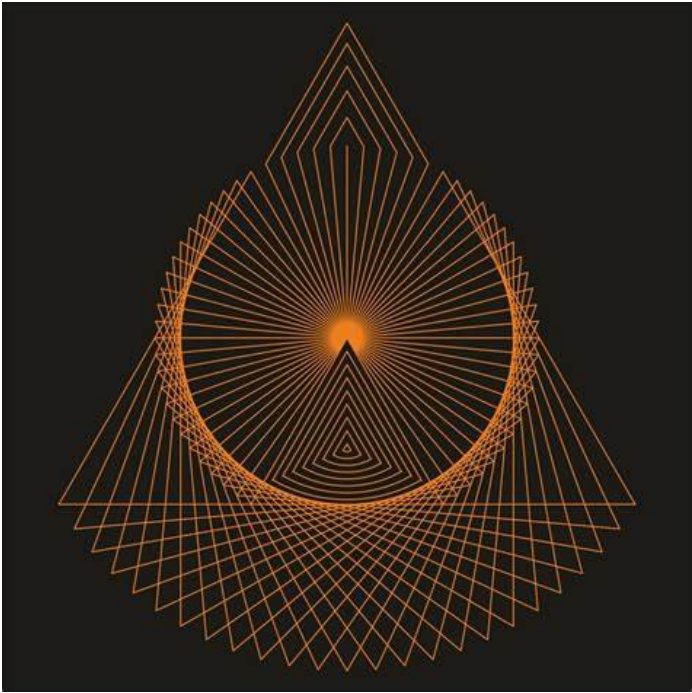

7. LAW OF POLARITY

Everything is dual in that it is a pair of opposites and opposites are identical in nature, but different in degree. There are two sides to everything. This is the spectrum of aspects in which things that appear to be opposites or contradictory are just two extremes of the same thing. The opposite pairs of love and hate, peace and war, positive and negative, good and evil, yes and no, light and darkness, energy and matter are all but varying degrees of the same thing. Thus transmute the emotions along the same line of any pair of opposites; from hate to love, from fear to courage and so on by rising above emotions and by consciously choosing to focus on higher positive aspects.

CATEGORY II

The perfection of Creation-Laws offers the mechanism of automatic and self-acting immutable templates of principles, structures, and designs upon all things both seen and unseen. Within them lies the process of creation, administration, and evolution by which all other laws are bound.

The Universal Laws of Creation are the keylonta codes to ensure the principles and structure of energy as creative balance and polarity. This maintains the intelligence of design and the genesis of life through conscious Divine action.

8. LAW OF UNIVERSAL SOURCE

The Universal Source is intelligent energy with the intrinsic tendency for things to self-organize and co-evolve into ever more complex, intricately interwoven and mutually compatible forms. Whatever exists now was created by the will of that Source, using its intelligence, impressed upon the universal energy.

9. LAW OF THE DIVINE MATRIX

The Divine Matrix is a geometric field or web of intelligent energy that connects all things in existence for all of time. Regardless of vibrational frequency, it serves as a conduit of information, a means for manifestation, and either a reflection or transmission of all truths.

10. LAW OF APPERCEPTION

The many aspects of perception, consciousness, and Divine understanding. Conscious of being flows within all units of the Universe. Throughout all eternity, everything has a consciousness and knows its own conscious being. Thought knows it is thought, energy knows it is energy, every single unit, from the Great Cosmos to the tiniest Atom, knows what the function of its unit.

11. LAW OF ATTENTION

Whatever you focus on and give your attention to will manifest into your life. Attention is the focus of your words, thoughts and actions that ensure that an outcome will manifest to the exact degree you give it your attention.

12. LAW OF CENTER

Everything has a center from which it obtains the source energy, intelligence and pattern which is continually self-renewing. Each center is connected to every other center and to the one center from which all life is vitalized.

13. LAW OF CONSCIOUSNESS

Totality is all Consciousness, All there is - is. This is the 'conscious of being' or 'awareness of its existence'. In other words, what we know at a given moment is reality for us as a conscious individual. What one perceives in consciousness from moment to moment is our individual reality and therefore real for us.

14. LAW OF CONTINUITY

Nothing in the Universe ever dies, is lost or destroyed, it just changes form. Everything becomes a part of forever. Matter and Energy are never destroyed only transformed or changed.

15. LAW OF CYCLES

A period of time divided into equal lengths and each length of time produces a certain definite effect upon the processional path of each living organism, object, or event. This effect repeats itself in the same order, and at the same intervals, creating a circle of time for each system.

16. LAW OF CAUSE AND EFFECT

For every happening in the Universe, there is an equal and opposite reaction. For every action and act of Intent there is a reaction or consequence. * For instance: *You reap what you have sown.*

This section refers to the Spiritual aspects of the Universal Laws and are sometimes referred to as “The Spiritual Laws”.

CATEGORY III

Higher Awareness – These are the laws of balance and polarity. They ensure the transcendence of all potential disturbances or disruptions to centeredness or the divine alignment of energies. It is the principles and laws of your perception to see what truly is, not what is being presented as illusions.

17. LAW OF INTENT

Engage only in thoughts, words, and actions that come from the higher self or highest good as the Universal Source supports the highest good. * For instance: *Engage in actions that support thoughts, dreams, emotions, and words in order to manifest things on earth.*

18. LAW OF ABSORPTION

All matter, regardless of its manifested vibration, absorbs emanations from all other matter and that matter is influenced by absorption. The manner in which visible light interacts with an object is dependent upon the frequency of the light and the nature of the atoms of the object. Objects have a tendency to selectively absorb, reflect, or transmit light at certain frequencies.

19. LAW OF ASSOCIATION

If two or more things have something in common, the 'thing in common' can be used to influence or control the other thing. The degree of control depends upon the size of the 'thing in common'. The more in common the things have; the more control can be used to influence the things.

20. LAW OF ABUNDANCE

In all things there is abundance. The law of abundance states that all creation starts with thoughts, and all things are possible with the right thoughts. The universe does not differentiate your thoughts for you. If you focus on lack and negativity that is what you will attract in abundance. If you focus on success, and good things, then that is what you will attract in abundance.

21. LAW OF ATTITUDE

"Attitude" is the only weapon that can harm an individual. Nothing, absolutely nothing can harm a human being, but his or her own attitude. Each experience is put in its proper perspective and hopefully resolved in a favorable manner. How you react toward those experiences, your attitude about them, determines how the experience affects you.

22. LAW OF ATTRACTION

The Intent of all thoughts, words, and actions produce energies, which in turn, attract like energies. * For instance: *Negative energies attract negative energies and positive energies attract positive energies.*

23. LAW OF AVOIDANCE

Refusing to handle a highly emotional or unpleasant situation, to deny living up to one's full potential, or neglecting to do something that should be done, will affect the physical body and mental mind. As well as lifestyle affairs through each incarnation, until that person correctly balances with the situation.

24. LAW OF BALANCE

This is the Key To Life. Balance is the nature to maintaining order within the divine universe. Each entity makes choices to exist, when those choices are made in conjunction with the flow of the energy, entities and events balance is maintained.

25. LAW OF MANIFESTATION

Thought is energy, focused on one central idea with one's undivided attention can be created in the mind and then physically transferred from any point of the physical body (eyes, mind, hands, etc.) to any object, subject, or ethereal realm for manifestation. The energy can be directed and controlled, with certain behavioral characteristics to accomplish a given result. Mostly commonly used method in healing.

26. LAW OF COMMUNICATION

Every unit, from the single atom to the galaxy system is "plugged into" a giant switchboard. Each unit has the ability to communicate with all other units through its own vibrational frequency. This communication system makes it possible for all beings to have psychic possibilities, and to communicate or share information with each other on a psychic level.

27. LAW OF CHANGE

The readiness of a situation to alter, modify, transform, or convert is caused by a continual change of inner attitude. As one continues to experience situations in life, their attitude adjusts to process the experience and change occurs.

28. LAW OF CONTACT

Things, animate or inanimate, once in contact with each other will continue to act upon each other even at a distance, long after the physical contact has been made.

29. LAW OF CORRESPONDENCE

Each component within a system or thing retains its own characteristics and takes on the characteristics of the system or thing as a total sum of its parts. Each component then has two functions; to retain its own characteristics and to function as the whole system or thing.

30. LAW OF DUPLICATION

If one person can do it, it can be done by others; perhaps to a lesser or higher degree, or equally, to equalize with the activity.

31. LAW OF ELEMENTS

Each unit has its own frequency and each element in that unit has its frequency of emanations connecting it to and compatible with the parent unit. When these elements are separated from the parent unit, they will still have the same emanations connecting them to the parent unit.

32. LAW OF FREE WILL

The law of free will operates in three ways.

1. Although many of the major events in a life are Astrologically predestined, there is always free will to mitigate the impact of the event, or to transcend it entirely. This will result from how you live your life up to the situation you have destined for yourself to experience. If you give grace and mercy to others, are positive, loving, compassionate, and demonstrate by your action that you have learned past lessons, you can minimize disharmonious experiences!
2. As you obtain Master of life awareness and develop conscious detachment, you will be far less affected by worldly events than in the past. A Master of Life enjoys all the warmth and joy that life has to offer, but detaches from the negativity by allowing it to flow through him without affecting him.
3. You always have free will in how you respond to any situation. If you respond with positive emotions, compassion and integrity, you have probably learned your karmic lessons and will not have to experience a similar situation in the future.

CATEGORY IV

Higher Frequency – These are the laws of conscious vibrations and are the foundation of all other laws. These establish the nature and reality of consciousness as inter-dimensional energy processes. These are the frequency and amplitude (vibration) of all time and space, and the foundation of energies' motion.

33. LAW OF TRANSMUTATION ENERGY

All persons have within them the power to change the conditions of their lives. Higher vibrations consume and transform lower ones; thus, each of us can change the energies in our lives by understanding the Universal Laws and applying the principles in such a way as to effect change.

34. LAW OF VIBRATION

States that anything that exists in our universe, whether seen or unseen, broken down into and analyzed in its purest and most basic form, consists of pure energy or light which resonates and exists as a vibratory frequency or pattern. All matter, thoughts, and feelings have their own vibrational frequency. The thoughts, feelings, and actions we *choose* also have their own particular rates of vibration. These vibrations will set up resonance with whatever possesses identical frequency. In other words, your thoughts are inseparably connected to the rest of the universe. "Like attracts like". As you choose good thoughts, more good thoughts of alike nature will follow and you will also be in vibrational harmony with others with like thoughts.

35. LAW OF REINCARNATION

Until you have resolved your Karma and fulfilled your Dharma, which are the deeds you must do, you will continue to reincarnate into sequential lifetime upon the earth. Neither the Gods nor the Lords of Karma bestow suffering upon you during these lives, you and you alone decide what you most need to learn in your earthly sojourns, and for each life experience you seek out other souls, often with shared histories, and always with Karmic configurations matching your needs. Whenever you act with intention you create Karma. Actions are considered to be thoughts, emotions, words, and deeds, and the motive, desire, and intent behind each. Disharmonious acts must be balanced in the future in this life or in a future lifetime, to have Soul growth.

36. LAW OF SOUL EVOLUTION

Everyone on Earth shares the goal of Soul evolution whether they realize it or not. We have reincarnated because we desire to evolve spiritually. By rising above all of our fear-based emotions and in so doing learning how to express unconditional love, we raise our vibrational rate, and move closer to a state of harmony. Even where it appears that we are not evolving we are in reality making progress. We learn through the pain of our disharmonious acts, which can be viewed as our mistakes or failures.

37. LAW OF MAGNETIC AFFINITY

By Astrologically choosing the time and place of your birth, you determine the nature or the affects you will experience in your life. On the other side, before we are born, we make decisions about the lifetime we will be entering into. You chose your parents, other souls to interact with you, and the Astrological configurations of your birth which determine your character, personality, abilities, restrictions, and timing for strengths and weaknesses.

38. LAW OF DIVINE ORDER

If you seek to understand the Law of Divine Order, study the natural balance of nature, for it works very much the same way. Everything is as it should be, although mankind (our energy gestalt) is far from experiencing its potential of total harmony.

There are no accidents. Your energy, translated into thoughts, words, emotions, and deeds, causes all your experiences. This assures that you always have the learning opportunities you require to resolve your Karma, and, as with you, the collective thoughts, words, emotions, and deeds of mankind create the environment for us all. If enough souls focus their energy upon peace, we will have peace. If the majority of souls are filled with anger, we may all have to experience war. We are all one, and like the many sub-personalities within you, the dominant traits of mankind (the entire gestalt) will emerge to resolve our group Karma.

39. LAW OF UNCONDITIONAL LOVE

The expression of unconditional love will eventually result in harmony. Unconditional love is not romantic love. It is the acceptance of others as they are without judgment or expectations. It is total acceptance of others without attempting to change them, except by our own positive example. The law of unconditional love says, "If you go out of your way to express unconditional love, you automatically rise above fear, and, as you transcend your fears, you automatically open to the expression of unconditional love.

40. LAW OF HARMONY

This law supersedes even the fundamental law of Karma, for harmony is the supreme potential of balance. The purpose of Karma is to attain harmony. If you throw a rock into a pond you disturb the harmony of the pond, you are the cause, the effect is the splash and the ripples that flow out and back until harmony is restored. Similarly, your disharmonious actions flow out into the Universe and back upon you, lifetime after lifetime, until eventually your own harmony is restored.

41. LAW OF WISDOM

If you have the wisdom to learn your lessons, through love and wisdom, you can mitigate your suffering. Sadly, we seem to learn the fastest through pain, through directly experiencing the consequences of our actions. As an example, you greedily take from others, and instead of learning through wisdom and love that this is wrong, you have to experience from others someone greedily taking from you, whether later in this life or in a future lifetime.

42. LAW OF ONE

Every Soul, living and discarnate, is connected at the level of the collective unconscious, deep within the Higher-Self. We are all part of a great energy gestalt called Universal Source, and because we are part of Universal Source, we are one. It is therefore, the unconditional love, the Eternal Truths (Laws), and Service To Others, that is the Law of One.

It is the goal of the gestalt to move the energy forward, creating more energy. So, in living harmoniously, we each increase our vibrational rate and intensify the vibration of the entire gestalt. When we are disharmonious, we decrease the vibration of the entire gestalt, because we are one, everything you think, say, and do affects every other Soul.

WHO WE ARE

Omicron develops, organizes, trains, conducts, and equips Omicron personnel in order to research, recover, and investigate Extraterrestrial Visitation Phenomena (EVP) and to provide standard practices and capabilities to interested or partnered organizations.

Humans have scanned and searched the cosmos for signs of other advanced civilizations in the universe throughout history. And believe they have found nothing.

At Omicron, we believe we have found everything. Our search has been more than curiosity and looking for extraterrestrials. It has allowed us to see the intelligence all around us.

As our expertise and consciousness in this field has expanded, it has invited the very things we have been looking for, into our awareness.
