Introduction

In Nature we find perfection, and such is the character of Tachyon. The information that the Tachyon contains is inherently perfect. The only thing we need for achieving health and balance in our lives is a freely flowing Energetic Continuum.

In other words, we need to become superconductors for Tachyon Energy by allowing it to flow through all the layers of our subtle bodies. As the Tachyon flows into our material cells, it completely organizes the entire metabolism in a perfectly balanced manner that is in the way we are meant to function.

Tachyon Healing

Everything exists along a continuum of energy. This means that every object – earthly or astral – exists in its own energetic continuum, including our bodies. Tachyon is not an energy as such but rather the first form of energy that comes out of Zero-Point Energy. It is formless and invisible and therefore studied in the highly specialized branch of science known as theoretical physics. It is only recognized by its effects and impact on the world around it.

The Tachyon contains everything required for the perfect energetic continuum, which exists in every human and non-human animal. When we become sick or are injured and can't recover, or suffer from mental or psychological pain it is because something is interfering or blocking the flow of Energy in our own energetic continuum.

Tachyon is not one frequency, but rather contains all the frequencies within it. This allows you to match up what is missing from your energy system as your body will take what it needs, whatever frequency or vibration that may be, and then do what it does best with that energy, namely, heal itself.

Tachyons are all around us, in fact if we were living in true harmony with our surroundings with good quality food, water and air and with no interference from the draining effects of EMFs or harmful relationships we would be channeling tachyons quite happily ourselves but as we are not living in a state of continuous grace it is necessary to supplement our intake to maintain a good general level of well-being.

Tachyons have an extraordinary healing and harmonizing effect. They can harmonize completely all energy fields that are result of gravity, electromagnetism and weak nuclear force. This reflects practically in multitude of ways. Tachyon energy harmonizes and enlivens the energy matrix, which shapes all matter and thus also our mental, emotional, etheric and physical bodies. All this affects greatly our physical health and well-being. Since it harmonizes all electromagnetic emissions it is also an excellent protection against all forms of electro-smog. A healing session inside the Tachyon chamber takes 20 minutes and has irreversible positive effects on all aspects of our being.

Tachyon has the ability to raise the biological energy throughout a human body to a level where the individual is unaffected by technology.

One becomes a superconductor of life force energy

Restores chakra and meridians to a "Healthy Zero Point".

Tachyon is not a frequency, nor is it a frequency approach. Frequency, oscillation or spin do not exist at the level at which Tachyon operates. Its effects are regulated by the internal wisdom of the SOEFs. When Tachyon is applied to an area, SOEFs convert what they need to restore themselves to perfect balance and order.

Tachyon does not heal, Rather, it provides the energy for the body to heal itself, like a boost for the Immune system.

Tachyon as only source energy to bring balance to our beings is that we do not have to deal with unwanted side effects. Even if we apply so much energy that parts of our organism experience a very strong, very quick healing effect, and other parts don't quite catch up, it is not a problem.

Tachyon Energy sometimes causes detoxification and healing reactions. For a very short time, one may feel overwhelmed, but there will never be a negative outcome.

Tachyon Energy doesn't require a lot of knowledge and experience to apply it correctly because the body is in charge of the healing process. We do not forcefully apply it for a certain specific effect. We let the body produce its own healing results.

Tachyon Energy is simply the natural catalyst for this self-healing process.

Energetic Continuum and Tachyons

In accordance with quantum physics, the material universe is nothing more than a very dense form of energy. Everything that exists in this universe, from the most subtle, refined realms of energetic structures, to the grossest, densest realms of matter, is aligned in an energy continuum.

Energy flows constantly from these highly refined subtle realms-starting from the causal or super causal world as it is referred to in esoteric teachings and moving down through the astral, etheric, electromagnetic levels and finally into the material realm of existence.

Everything that exists on Earth exists within its own Energetic Continuum, our bodies being a perfect example. In addition to the material, physical body that we perceive with our senses, we have several other layers of energetic bodies. Through all these layers of energy, an Energetic Continuum flows from the highest, most refined subtle bodies down to the material or physical body. The energy flowing through the Energetic Continuum comes from one source. Spiritual teachings acknowledge that all energy comes from The Universal Source. However, modern physics calls it Zero-Point Energy or Free Energy. At this point, it is important to understand that Zero-Point Energy should not be confused with a particular form of energy, such as etheric or astral energy. Zero-Point Energy is formless. All realms of the subtle energies are just parts of the Energetic Continuum.

Tachyon Energy is the very first energetic structure that emerges out of non-structured, formless Zero-Point Energy or the first energy out of the partiki unit. Just like Zero-Point Energy, Tachyon is not limited to a certain frequency. Tachyon cannot be measured in the Hertzian frequency spectrum. It is not a certain type of energy. Rather, it includes all energies within itself. Its qualities are much like Zero-Point Energy, varying only in that it is a structured field.

In itself, Tachyon Energy has stored all the potential needed to create a perfect Energetic Continuum in every individualized form of life. Everything that transpires in the human body, for example, is already encoded within Tachyon Energy in perfect form. An excellent example of this is seen in the animal kingdom, where it has been observed that animals not influenced in any way by human beings live completely healthy lives. For example, mammals have a life span that is up to seven times their growth period. For a human being, that would mean 140 years of perfectly healthy life. Of the 40,000 chronic and degenerative diseases known in human medicine, only a few are known to exist in wild animals!

This is because wild animals do not have the ability to block the Energetic Continuum. In Nature we find perfection and such is the character of Tachyon Energy. The information that Tachyon Energy contains is inherently perfect. The only thing we need for achieving health and balance in our lives is a freely flowing Energetic Continuum. In other words, we need to become superconductors for Tachyon Energy by allowing it to flow through all the layers of our subtle bodies. As this energy flows into our material cells, it completely organizes the entire metabolism in a perfectly balanced manner that is the way we are meant to function.

If any layer of the subtle body system is blocked, energy will not flow freely down into the next grosser level. From that level onward, there will be significant deficiencies of energy. Blockages in any of the subtle layers prevent Tachyon Energy from flowing freely into the material body. This is why so many diseases are co-influenced or co-created by blockages in subtle bodies. This also explains why our psychological state affects our physical body. In fact, the emotional and mental bodies are so subtle they do not directly interfere with the physical body. Since the flow of life force information to organize our metabolism also has to flow through the mental and emotional bodies, there is an indirect influence when these bodies are blocked. Significant blockages eventually create physical disease. This information is the basis for the creation of many different frequency-oriented energy systems.

We know of photon energy, crystal energy, magnets, orgone energy, light acupuncture, radionic devices, photon lights, electromagnetic and sound therapy, all of which are used as therapy. Of course, all of these energy systems work well when they all have the potential ability to remove some blockages, to remove stagnant pockets where energy cannot flow freely in a certain layer of the subtle body system. However, energetic frequency therapies, in general, have two limits. One is that all these energies are limited to a certain frequency, for example, between 16 and 32 mu-meters. This is a certain spectrum of the auric field of our subtle body layers, and provided we have blockages between 16 and 32 mu-meters, photon energy, if applied correctly, can help.

But what if our problem is not rooted in that spectrum of frequencies? What if our problem is mainly an energy blockage in the realm of 35 to 50 mu-meters? Of course, there might be some small benefit from applying photon energy, by indirect influence, but the problem will not be cleared. Photon energy then, is something that might help a little bit, but it will not really take care of the problem at its root. So we know that, just like photon energy, all subtle energy systems that are used for therapies have this one big limit, they only work on their specific frequency. The other limit is that the effect of any particular frequency is determined by the nature of that frequency. Photon energy, orgone energy, or electromagnetic energy, for example, can help because each has certain characteristics that forcefully affect the human body to move into another direction. However, if we don't need this particular, specific frequency, such energies can also be harmful. Orgone energy can heal, but orgone energy can also make you really sick. It requires knowledge and experience to use these subtle energy devices safely and correctly.

Tachyon Energy is totally different from all of these. Tachyon Energy is not a certain type of energy, but rather includes all energies in itself. Whatever goes wrong in our physical body or in the subtle bodies, can be corrected by applying specific information for that particular process. This is possible through Tachyon Energy, for Tachyon Energy is the gateway back to Zero Point energy. This is something that no frequency can do. All frequencies are just part of the whole, part of what is anchored in the Zero Point energy, but all frequencies are limited in their specific effects. Tachyon is totally non-specific. Tachyon really doesn't have any effect in and of itself. What Tachyon does is give our organism, our body, our subtle bodies the chance to produce whatever effects they need. And since our bodies are incredibly intelligent, they always produce the effects that are good for them. The two limits that we find confining all other forms of energetic medicine just don't apply to Tachyon because Tachyon Energy is not limited to a certain frequency. Another important difference between other subtle energy devices and the energy that they use and Tachyon Energy is that Tachyon cannot be influenced in any way whatsoever by any other form of energy.

All other forms of subtle energies that are used in energetic medicine can be influenced, for example, by one's own thoughts and feelings. This is due to the fact that below the speed of light energies have something that is called the gravitational pull, that makes energies attract each other so that they stick to each other. This, of course, creates influence, changing and altering the energies in their specific effects.

Tachyon moves beyond the speed of light so it has no gravitational pull so it cannot stick to anything or any energy, and no energy can stick to Tachyon. No matter how "bad" our thoughts are, how low our emotional content is, no matter what kind of negativity we produce in any form it can never alter Tachyon Energy and its ability to give us access to the Zero Point energy. So potentially, all problems we have--mental, emotional, spiritual, or physical--can be positively affected by Tachyon Energy! Another wonderful aspect of using only the source energy is we do not have to deal with unwanted side effects. Even if we apply so much energy that parts of our

organism want to have a very strong, very quick healing effect and other parts don't quite catch up, this won't be a problem. It sometimes causes detoxification and healing reactions, that for a very short time may feel overwhelming, but there will never be a negative outcome. Tachyon Energy is also free of that second limit. It doesn't require so much knowledge and experience to apply Tachyon correctly because our human energy field and body are in charge of directing it.

In quantum physics, we call the energy that fills the cosmos "Zero-Point Energy". It is formless, moves faster than the speed of light, and is omnipresent. Held within Zero-Point Energy is the potential of all existence and the intelligence to create perfect form. The condensation of Zero-Point Energy into Tachyon Energy begins a continuous energy flow called the Energetic Continuum. Without form or vibration and moving faster than the speed of light, this flow of energy contracts into Tachyon as it moves down in a vertical stream towards the speed of light. At the point of light, the Energetic Continuum interacts with the Subtle Organizing Energy Fields (SOEFs) and begins creating the energetic matrix from which all physical forms are structured. Because its source is Zero-Point Energy, the Energetic Continuum contains all of the potential and intelligence held within it. Simply stated, the Energetic Continuum flows from infinite formless expansion to finite contraction of form. The graphic below illustrates the Energetic Continuum as it flows from Zero-Point Energy to Tachyon Energy and through the speed of light.

Once the Energetic Continuum is understood, we are then able to understand the effects of blockages within the flow of energy through the continuum. With this understanding, we then have the ability to realign ourselves with our natural state of harmony and health. By opening ourselves to the flow of the Energetic Continuum as it travels from Zero-Point Energy through Tachyon to the SOEFs, our being is energized and restructured so that we may create negentropy or anti-aging.

ENERGETIC CONTINUUM

BEYOND LIGHT

The Zero-Point Field is a quantum field that exists beyond the speed of light. It is the limitless source of all potentials. Tachyons are the quantum particles of the Zero-Point Field. Unlike the formless ZPF, tachyons have form. Tachyons directly interact with Subtle Organizing Energy Fields (SOEFs). The SOEF exists just below the speed of light. All slower-than-light forms are held together by SOEFs. Within a vital Energetic Continuum, every SOEF converts tachyon into the required frequency to support its own existence, and every existence supports the whole.

TACHYON IS THE SOURCE OF ALL FREQUENCIES

Pleiadians and other cosmic civilizations of Light use tachyons as basic source of energy: as hyperdrive energy source for their spaceships by creating hyperspace wormholes, for healing, information transmission and for other purposes. Tachyon belt that represents the border between the entropic and syntropic universe is now surrounding our planet. High energy cosmic rays enter this Solar system from interstellar space and carry tachyons with them. Some of these tachyons reach the surface of our planet through a hyperdimensional wormhole that we have created with a quartz oscillator crystal aboard Genesis II spacecraft and these tachyons can be utilized in our Tachyon healing chamber that we have developed in cooperation with the Pleiadians. This special Tachyon chamber enables the arrival of tachyons from higher dimensions into physical matter.

What are Tachyons?

Tachyons are subatomic particles that travel faster than light. They are particles that infuse physical matter with spiritual light. Tachionization is a technological process that infuses physical matter with an increased quantity of tachyons and permanently changes quantum properties of atomic nuclei which compose that matter. Chemical composition is not altered, the change occurs on subatomic level. Because it decreases entropy of physical matter it reverses the aging process and strengthens the immune system.

Is the tachionization permanent or will the effects dilute after time?

This process is permanent and irreversible. It is not possible to remove tachyons by exposing them to heat, magnetic field or any type of chemical reaction.

Is the tachionization process safe?

This process is completely safe. It does not change chemical composition of matter and it does not create any type of electromagnetic field nor any type of radioactivity.

Why are tachyon products a good choice among wellness products?

Tachyon products are among the most effective means to improve our quality of life, removing physical causes of many diseases and imbalances in our bodies. Tachyon products cannot be misused and go well along with other wellness products. Since tachyons equally influence our physical body and our higher energy bodies, they improve our well-being and accelerate our spiritual growth dramatically.

Are there any side effects of tachyon products?

It is good to know that they trigger a purification and detoxification process that lasts up to a few weeks and can have some mild side effects, such as headaches, sleeplessness,...This is just a sign

that toxins are rapidly leaving your body which is in fact getting healthier! It is good to drink plenty of water during that time.

How Tachyons influence the body

From the healing point of view, our complete well-being is an integration of the physical, emotional, mental and spiritual levels of our auric bodies. Physical beings evolve in a continuous upward spiral of order to chaos (and/or disease). If left unchecked, the energy spiral continues through the chaos to higher levels of order. Chaos is a stepping stone from one level of order to the next higher level. Every living being experiences this process of energy flow whether or not they are aware of it.

We begin with the Toroidal space, which describes the shape of the energy field around the body as a torus or doughnut shape. The human aura appears as a series of nested spherical torus formations, or toroidal fields. The toroidal fields are titled the etheric layer, the emotional, the mental, the astral, the etheric template, the celestial, and the causal.

Our body is interacting between the nested toroid fields with what is called the Subtle Organizing Energy Fields (SOEF) or more commonly referred to as the chakra vortices. When balanced, organized and functioning at its peak, the body is in a state known as negative entropy or anti-aging. When blocked or in a disorganized state, it slips into a state of chaos known as positive entropy, the most radical example being the production of cancer cells. If an SOEF is blocked or depleted, the flow of life force energy through the Energetic Continuum becomes deficient. SOEF's can be energized in a number of different ways. Our body naturally does this through the chakra system, oxygen, sunlight, water and food.

When those sources are depleted of Tachyon Energy, this can negatively impact our lives and may show up as symptoms such as pain, fatigue, and dis-ease. Disease or illness comes when a blockage occurs within our individual Energetic Continuum. It makes sense, then, that we must clear the blockage(s) to restore the vertical alignment of our Energetic Continuum. In essence, a blockage is defined as a disorder or chaos in the Energetic Continuum causing an energy deficiency. These blockages in the continuum are in the form of particular frequencies that ultimately create disorder or dis-ease in the physical body.

Tachyon, because it is the source particle of energy that organizes and energizes the SOEFs, provides the potential to restore harmonious healing frequencies. Creating a neg-entropy effect, Tachyon organizes that which is disorganized. It realigns and restores the SOEFs to their natural state of order and balance, thus creating a state of well-being or health.

Spiritual and Physical Benefits of Tachyon

SPIRITUAL BENEFITS

1. Tachyon profoundly promotes spiritual development and in many cases has quickly opened up spiritual channels (3rd Eye).
2. Tachyon heightens spiritual and psychic awareness and helps to gently access all emotional memory blocks for mental and emotional release.
3. Tachyon deepens the meditation experience profoundly.
4. Tachyon assists in developing greater visual and audio abilities psychically.
5. Tachyon assists in out of body experiences, in a positive, pleasant manner.
6. The Tachyon consciousness works in perfect alignment with your own particular mission and accelerates your ability to align with your purpose here on earth.
7. The Tachyon Consciousness can teach and guide you.

HEALTH BENEFITS

1. Tachyon restores chakra and meridians to a "Healthy Zero Point".
2. Tachyon accelerates the body's natural capacity to heal from illness or disease.
3. Many have reported that fields of Tachyon increase their physical and mental stamina.
4. Tachyon may increase stamina so you feel rejuvenated.
5. Tachyon profoundly affects the DNA by regenerating and activating the higher DNA strands that are currently coming online in ascending humans.
6. Tachyon promotes pain relief.
7. Tachyon assists the body in mild but needed detoxification.

MANIFESTING

1. Tachyon Living Products amplify your desired goals and intentions.
2. Tachyon works beautifully and harmoniously by amplifying crystals and gemstones natural attributes as well as those that have been imbued.
3. You can use Tachyon during healing sessions to amplify the results....to clear all resistance and to amplify the energy of the healing being used.
4. Place Tachyon in your wallet or purse next to your money and allow it to amplify the field of abundance for you.
5. Use Tachyon to amplify and "announce" your goals.

Tachyon Activator

Glass or resin Tachyon activators increase negative entropy, which promotes balance and harmony in the body. When Tachyon Energy Activators are placed on an injury or an unbalanced area they help to swiftly heal the injury and rebalance the area. Tachyon Activators direct Tachyon flow. Some activators have distinct colors and each color has its own energy or frequency so you can choose the color or colors that resonate with you. Other activators may contain several colors allowing them to store very specific frequencies for very specific healings. When Tachyon energy is combined with the color in the activator the energy is 95% stronger than the power emitted from the activator alone. Balance and harmonize your body with Tachyon Activators.

You can use the Tachyon Activator like any orgonite once activated.

The Tachyon activator become a permanent Tachyon healing disc, constantly connected with the unified Zero Point Energy field, when it is subjected to the tachyon process in the Tachyon Chamber.

Tachyon Activators are typically 1.5 inches (personal size), 4 inches (room size), or 8 inches (whole body size).

The 1.5 – inch size with crystals is a personal size and can be worn continuously for total health benefits. It can also be used for localized healing on the body.

The 4 -inch size with crystals is used for fast cleaning and energetic improvements of food, water, drinks, flowers, or drugs. It also works well for spot healings where noticeable pain or discomfort is felt.

The 8 – inch size with crystals is used for standing on or sitting on during tachyon sessions. This creates a circulatory connection throughout the body.

Tachyon Grounding Mat

The Tachyon grounding mat helps the flow of tachyons through the body by keeping the tachyons in contact with the body. Without the mat, the tachyons would flow from head to sole and out to the copper frame. While this is okay because you are still encased in the tachyon field, the mat provides concentrated levels of tachyons through the body.

Only put bare feet on the mat. No shoes, socks, electronics, or jewelry should come in contact with the mat.

If you are not pregnant, you may sit on the mat. Pregnant individuals should only set their feet on the mat.

Tachyon Chamber

The Tachyon Chamber is a unique place where the generation of Tachyon Particles is permanently created to pour Tachyon particles in at very high levels. The Tachyon Chamber is a frequency therapy and enables tachyons, which are subatomic particles, to come into your physical matter.

Tachyons are faster than light particles, working at the sub-atomic level. They have a profound effect on the human body, energy field, emotions as well as the mental and spiritual makeup of a person. Tachyon works directly with your DNA to initiate repair and upgrade the body's template. Tachyon also works to assist in manifesting the life you want and amplifies your desires and intentions. It's the Zero Point field of high vibration where neutral energies clear and accelerated frequencies are attainable. The Tachyon field culminates almost effortlessly into higher light and knowledge...into higher vibration and truth!

Tachyons are subatomic particles with no mass which move beyond the speed of light, these particles increase negative entropy on the cells in the human body. The ability of the particle's movement provides the capability of providing a very positive effect on our bodies.

Three main factors benefit the body when utilizing Tachyon technology.

- Energy
- Immune System Enhancement
- Low vibration electromagnetic vibration clearing

Tachyons do not heal diseases, but rather tachyons provide the body with what it needs to restore balance and heal itself. When there is pain or disease, the afflicted parts are out of balance. If the area is left out of balance, then the pain/ disorder continues to affect more and more of the adjoining part of the body. If the area is brought back into balance, then the body's natural healing abilities restore the affected part to full health.

Healing begins from the inside out. Everything in our life and environment, the way we eat, drink, think and live, creates the breaking down of our natural defenses. Your most important tool in this process is to desire healing. IT IS IN THE DESIRE THAT WE CREATE. Tachyons help your body to heal and regain that state of wellness that we all desire. Your body is what heals. As a result, when combined with human tissue & electrical system, any diseased, aged, or damaged cells are entrained with the extreme high frequency of tachyon particles and thus restored to their optimum state of health.

This process is completely safe. Tachyons do not change the chemical composition of matter and they do not create any type of electromagnetic field or any type of radioactivity. A healing session inside the Tachyon chamber takes 20 minutes and has irreversible positive effects on all aspects of our being. For best results, it is best to avoid caffeine for 24 hours prior to a session. Wear comfortable clothing to sit within the chamber. Remove all jewelry, electronics, and surface metal objects from your body.

People feel a variety of subtle sensations such as warmth or energy. Some people feel specific areas that seem to be “receiving attention.” Some people go to sleep. Each person has a different experience. Often people report, “I didn’t go to sleep, but I went *somewhere*.”

Each person responds to the positive effects of the tachyons in a different way. Sometimes the effects are immediate and sometimes the positive effects (such as cleared skin) emerge a few weeks later, after visits to the chamber are completed.

The tachyon chamber usually triggers a purification and detoxification process that can last up to two weeks. There can be some mild side effects, such as light headaches or sleeplessness. These are just signs that toxins are rapidly leaving your body. Drink extra water to help the toxins depart!

If you are in pain on the day of your session, your pain could increase a bit following the session, but should subside and be gone within a day or two. This additional pain is due to an energetic operation occurring. Your body is in fact getting healthier!

This technology is not intended to take the place of your physician in the diagnosis, treatment, cure or prevention of any disease.

Entering the Tachyon Chamber

If you are planning to enter the Tachyon Chamber, it is best to be prepared. If you know ahead of time that you will be using the chamber, please avoid caffeine 24 hours in advance. Caffeine has an effect on the brain and when introduced to the Tachyons (negative entropy), a headache can occur as the Tachyons are zero point balancing those cells.

Before entering the chamber, remember to remove

- shoes and socks
- Jewelry not to be activated
- Keys
- All electronics and cell phones
- Belts or buckles
- Coins
- Hearing aids
- Battery operated devices
