

AQUATIC SPECIES

An aquatic species is any species, whether vertebrate or invertebrate, that lives in either fresh or salt waters for all or most of its lifetime. In some instances, the species may spend short periods of time on land.

The race of beings listed in this section are adapted to function on both land and water environments. They are hominoid creatures with reptilian, as well as, amphibian-like features and are semi-aquatic in nature.

AMPHIBIANS OR CYGNUSIANS

Amphibians are similar to Saurians or Reptoids, yet being hominoid creatures with reptilian, as well as, amphibian-like features and semi-aquatic in nature from the Cygnus Constellation.

They are a vertebrate, bipedal species. They have tubular gills, slits around a nose area, and a ridged fin on top of their head. They have a muscular body with a thick neck, and skin much like shark skin. Their colors are generally brown, tan, with flashes of pink and blue. They tend to be 5-6 feet tall. Their lifespan is 200 Earth years.

They once lived on land, yet became more aquatic over the centuries. They have been encountered near swampy regions, rivers, etc., and have been known to attack without being provoked.

It is interesting that some types of Greys and Reptoids are believed to be semi-aquatic, having webbed fingers and toes (Draconian texts).

MINTAKEN

Mintakans resemble frogs and toads. There are, however, some major differences. They are mainly bipedal in stature. Their skin is smooth and hairless, is noted for its iridescent colors, which range from bright reds, oranges and greens, to yellows and browns.

Their eyes are not too bulgy, but are quite large, 'wraparound' and bright red, orange or greenish-yellow in color. The nose consists of two small slits above a very thin set of lips. The mouth, when opened, is very large and frog-like. The ears are two small round circles on either side of the head. The head is large and seemingly disproportionate to the rest of the body, while the neck seems to be non-existent. The body, arms and legs are very muscular. Toes and fingers are long, thin, webbed and four in number: toes have small claws.

The males, slightly smaller than the females, are between 7 to 8 feet in height. The females, slightly larger, range from 7.5 to 8.5 feet tall. Mintakans are noted for a series of three small, thin, interconnected ribs that run up their backs and end at the top of their heads.

They are noted for their great proficiency in psychology, as well as in all methods of mind manipulation. They have a great body of scientific knowledge and vast libraries of inner wisdom that go back over 15 million years.

OCTORIONS

This species comes from a parallel dimension. They are highly intelligent with a lifespan of 10000 Earth years. They are telepathic in their communication. They have eight tentacles that hang from their cheek line and they are capable of articulating the tentacles individually. There are large penetrating eyes set deep within the face. The tentacles cover a mouth.

They are a soft body species, but with a spiny, ridge backbone. They tend to have three layers of chromatophores under their skin, and each layer has xanthommatin particles that reflect back a different color. The top layer produces a yellow color, the middle layer reflects back a red color and the bottom layer produces a brown color.

There are 150 varieties of this species, and most average 5 – 6 feet in height. For the most part they are pretty docile, and tend to choose to be neutral in most situations.

They have a variety of ships at their disposal and are master navigators.

SIRIUS AQUATICS

This is an aquatic reptilian species from the Dog Star Sirius. They have been described as bipedal, average in height with webbed hands and feet and gills.

They come in a variety of colors ranging from green, blue, brown, and tan. Most have a skull ridge or rill on top of their head. Many have protruding spines on the jawline and chin. They have well defined mouths usually with small pointed teeth. They are generally 4-5 feet in height.

They have been associated with the half human, half fish or mermaids and mermen. This species is not generally considered malevolent, although it will defend if it feels threatened.

AVIANS OR CARRIONS

These highly evolved Avian/Carrion Species entered the third dimensional Universe from another dimension, billions of years ago. They remain as an elite group of twelve dimensional beings.

Many Avians in this Universe have evolved from small birds that were seeded by the twelve dimensional Avians on 3D planets in various galaxies. They evolved huge diversity of color, size, and adaptations. Eventually many developed an expanded consciousness because of their ability to see beyond the solid world.

Their sentience developed from their visionary perspective and ability to move via thought. Some found themselves able to teleport and soar in their minds to other lands and planets.

This expanded their reach and they found themselves inhabiting new worlds. Later avian species were genetically mixed with humans, as this was an experimental trend in this universe.

Birds of Earth are a gift from the higher dimensional Avian beings to help regulate the electromagnetic atmosphere.

OGATTANS

A short humanoid bird-like species extremely friendly and spiritually oriented, from a planet of prismatic domed communities of crystalline material surrounded by crystal forests emanating rainbow colored auras permeated by the harmonics of the music of the spheres in the Constellation of Centaurus.

Typical height is 2 – 3 feet tall, with a typical weight of 20-30 pounds. Feathers range from browns to greys. They typically have well developed four fingered hands with fully developed wings and small bird like talons.

ANAKITES OR ANAKIM

Were once referred to as the 'Els', short for 'Elder Race' or simply as the 'Giants').

This race is a branch of ancient humans descended from Anak of the Nephilim (Anunnaki), who broke-off from mainstream humanity because of their vast size.

They are said to range anywhere from 12-15 feet in height, although in configuration they are remarkably similar to

'International Galactic' humans. They have interstellar traveling capabilities. They were the descendants of the Nephilim.

They had a warlike mentality and made up the tribes known as the Kenites, Kenizzites, Kadmonites, Hittites, Perizzites, Rephaims, Amorites, Girgashites, and Jebusites.

NEPHILIM

Nephilim is translated as "gigantes". They were the giant soldiers brought from Nibiru to Earth by the Annunaki to maintain the peace between the different civilizations and carry out the laws of the Annunaki.

They were 14 to 16 feet tall in height and many

referred to them as "fallen angels" however this is not the truth. When left to their own devices after the Annunaki Gods left Earth, they hired themselves out as mercenaries to the other Earth civilizations and wound up warring against each other.

GREY SPECIES

The majority of Greys come from the Zeta Reticuli system, which is a pair of wide binary stars in the southern constellation of Reticulum and was one of the original “seeded” planets. This system is located at a distance of about 39 light-years from Earth. Zeta Reticuli is orbited by a circumstellar debris disk. Both stars are solar analogs that share similar characteristics with the Sun and they belong to the Zeta Herculis Moving Group of stars that share a common origin of about 8 million years.

From the southern hemisphere the pair can be seen by the naked eye as a double star in very dark skies. They are known as "Greys" due to the greyish color of their skin, however they have also been referred to as “Chigs”. They can be found in the third, fourth, and fifth dimensions. There are several species of Greys which have interacted with mankind in one form or another throughout history.

The Greys share several common characteristic traits to include a telepathic genetic makeup, technological collective consciousness, and the inability to feel emotion. They are time travelers and have been known to work with the Demuirge to create and maintain planetary creations. They can shift from 3D to 4D to 5D and can move other beings through these dimensions as well, by shifting their frequency. They operate from heightened emotional states, and thus are not influenced by the denser, baser emotions of human physical beings. They can manipulate energy fields, which allow them to heal and create mental projections and alter sensations. They operate under the system of a hive by maintaining a collective interconnection. They can seem lost if they lose that collective interconnection.

Not all Grey’s are benevolent and some have a sinister agenda. There are two main groups of Greys that interact for the development of human species. These are the E2s (4D collective of evolutionary teachers) and Meleah (Zeta/Hyman Hybrid). Their main purpose is to upgrade DNA and shift frequencies to move other beings to the fifth dimension.

Most Grey’s range in size from three to six feet in height and have three to five long fingers of which some are webbed. A standard description of Greys would be thin bodied, sexless beings with smooth grey skin, an enlarged head, and large black eyes. They are described as bi-pedal humanoid beings that possess reduced forms of, or a completely lack of, external human organs such as nose, ears, or sex organs. Their bodies are usually depicted as being elongated, having a small chest, and lacking intramuscular definition.

BETELGUESE OR LARGE NOSE GREYS

The lifespan of these greys is 500 Earth years. They range in size from 6-9 feet tall. Their skin has a greenish gray cast to it. Their bodies are tall and thin. They have a large protruding nose feature, hence the large nose designation.

Native to or have long inhabited the worlds of the Betelgeuse star system (Alpha Orionis). Their ships are round or circular. They are observers and explorers.

ZETANS OR TALL WHITE (Benevolent)

They come from the Zeta Reticular constellation. This is the group from which the Brotherhood of the Watchers was formed.

They have great interest over the Earth Project and continue to watch the development with great interest. Their lifespan is 1000 Earth years. Their ships are round or oval shaped. They were the first cloned greys.

BLUES and GREENS and BROWNS

They are uniformed have wide faces and a darker blue color with almost comic movements, appearing to float or glide along. Others have described as looking like a typical Grey except for the coloration and even humanoid varying from dark to brilliant blue. The (so-called) Greens are cousins of the Zeta Reticulans and the Greys. Possibly an off-shoot or the descendants of an old Zeta Reticular colony, though none of the three will comment on this directly.

Less aggressive than the Greys, they are more aggressive than the Zetas. At the same time, though prone to doing "rude" things, they are yet more sympathetic to individuals and their pains and trials and have a high regard for those who seek wisdom, regardless of race, planet or current level of understanding.

In their own way this makes them less predictable than either the Greys or the Zetans. There appear to be many sub-groups or operating missions, including not a few individuals operating here entirely for their own reasons. Browns are rarer, like the rare blues and there are several grey-brown species. Browns have been describes as 3 -7 feet tall, in various shades of brown to a tan color. Skin has been described in some cases a leathery, wrinkled appearance and eye size varies from a large almond shape to small and reptile like.

These three to four feet tall species come in various shades of gray with large heads and large shiny black eyes. Their body structures are very thin, and they have the ability to telepathically communicate with each other. These are drones that conduct lab work and perform experiments for other Grey species. They are not considered malevolent, but merely drones that carry out work. These are the Greys that work with the ancient Star seeders. (Unpredictable)

These Greys are typically six feet tall and have a whitish grey to pink pallor. They are the evolutionary helpers or guardians that watch over species progression. They also assist with modulating star seed energies to integrate with 3D physical bodies for incarnation. They belong to the E2 class of Grey's. They think and create using their imagination (or thought form projection) and by tapping into astral knowledge and surrounding energy fields. (Benevolent)

The Short Greys also known as the Zeta Reticulums, the Greys are some of the most well-known aliens. They are commonly depicted throughout alien pop culture and are the culprits of most alien abductions. According to most descriptions, they stand 3 to 5 feet tall, have bulbous heads and over-sized black eyes. Although they possess a mouth, they seldom speak, as most communication is carried out telepathically.

The short Greys are said to be a genetically-engineered worker race that are controlled by their superiors, the Tall Greys. Their telepathic abilities allow them to constitute a type of hive mind consciousness. (Malevolent)

Being genetically-designed to carried out scientific missions, the short Greys are emotionless and cruel. They are also responsible for creating a human-grey hybrid race.

The Tall Greys standing 7 to 8 feet tall, hairless, and pale, the Grey Masters are the ambassadors of most meetings between human and alien forces. They represent both human and grey biological material

combined, and therefore play a lead role in assisting the Short Greys with interacting with humanity. This species is involved in many genetic experiments, and there has now been a hybrid human-Grey race created, containing mind control and diplomatic agreements with the 'shadow government,' to which they represent.

Sources claim they originate from a star system in the Orion constellation. The Tall Greys supervise all abductions and human experiments but are seldom present during these events. They prefer to employ the services of their minions, the Short Greys.

As it would seem, they are keen on developing a stable human-grey hybrid race, one worthy of inheriting Earth. An advanced, self-centered race, they place little value on human life. They consider us their property. (Malevolent)

GRAILS

These are saurian 'grey' type entities which are apparently somewhat taller than the usually-encountered greys yet with extremely thin 'rail-like' torso and limbs yet very strong.

These Greys are typically four to six feet tall and have a malevolent agenda. These Greys are the species that is most widely associated with the alien abduction phenomenon for experimentation. These Greys are different in many ways, including their nature, moral dispositions, intentions and physical appearances, some having a different skin color. They are able to induce hallucinogenic states or directly provoke different emotions. Their agenda involves conquest.

NEONATES

The Neonates are an alien species with extreme intelligence. Neonates are three to four feet tall, have a fetus-like facial appearance with a large oversized cranium.

They are thin muscled and spindly, have light gray to dark cream-colored skin, five digits on each hand and are reported to possess telepathic abilities. The Neonates have pupils and retinas in their unusually large eyes. Alien Greys have only four digits on each hand as opposed to the five digits on each hand of the Neonate. Neonate aliens that they originated from the Zeta Reticuli star system. (Unpredictable)

HUMANOID SPECIES

Genes and the environment influence human biological variation in visible characteristics, physiology, disease susceptibility, mental abilities, body size, and life span. Though humans vary in many traits (such as genetic predispositions and physical features), there are similar traits that pertain to being classified as human such as: bipedal, walking upright, cognitive skills due to a larger brain, two arms, two legs, torso, neck, head, facial features, and language. Many human species are sexually dimorphic, though not all.

ALPHA CENTAURIANS (Benevolent)

Alpha Centarians hail from Alpha Centauri in the Constellation of Centaurus, which is located between the constellations of Lupus and Vela. It is best known for its brightest star, the triple star system of Alpha Centauri (also known as Rigel Kentaurus). One of its triple stars is Proxima Centauri, which, at 4.3 Light Years, is the closest known star to Earth.

The humanoid Centaurian closely resembles Earth humans. The male is very muscular and well-proportioned with blonde, brown, black or red hair. The eyes are either slightly Asian in shape, or are rounded, and are brown, black, blue, green or hazel in color. In height, males vary from nearly 6 feet to almost 8 feet. Their skin color can be either a very dark brown or a slightly tanned white color. The female is also well-proportioned but less muscular, and ranges from 5 feet 5 inches to almost 7 feet tall. Centaurians are known for their abilities as great strategists and Federation Liaison Counselors. They excel at bringing groups of diverse sentient Beings together and at achieving their goals in a most peaceful and harmonious manner.

The main activity of the Alpha Centaurians can therefore be inferred as promoting social justice and human freedom, and the responsible use of advanced technology. The Global solutions that can be promoted by the Alpha Centaurians include social justice at a global level, creating zones of peace or peace sanctuaries, human rights and sustainable development.

AGHARIANS - (or Aghartians) (Nordics)(Pleiadians) (Benevolent)

A tall race of blond haired, blue eyed humanoids often related to the star system Pleiades'. Both male and females are well built with muscular athletic bodies and stand 6 - 7 feet tall. Facial features are humanoid, with eyes, nose and lips that vary in size.

They have reached a very high degree of civilization, economic organization and social, cultural development, together with extraordinary scientific progress.

ANDROMENDANS (Benevolent)

Humanoids from the Andromeda Constellation. They usually wear the traditional multicolored Galactic Federation jump suits. Their lifespan is typically equal to 5000 earth years. There are over 1015 variations of Andromedans. Andromedans consist of two basic human types:

The first is a Caucasian that ranges from a so-called “Nordic” type (blonde hair, blue eyes, pale skin that can sometimes have a blue tint), to a “Mediterranean” type (light to dark brown hair, gray to brown eyes, tanned-looking skin). The second is a typical Oriental, with dark hair, dark Asian eyes and a skin color that varies from very pale brown to a dark shade of brown.

The eyes of all Andromedans are slightly larger than those of Earth humans. The lips are thin and colored almost a light pink, while the ears are fitted slightly lower on the side of the head and are slightly smaller in size. The hands and the feet are delicate in appearance with long fingers and toes. The men vary in height from 6 – 9 feet. The women range in height from 6 - 8 feet. Andromedan women are noted for their alluring energies and their buxom figures. They are considered to be in the class of light beings.

The Andromedan are known for being the shipbuilders of the galaxy. They are known for building large biosphere ships either in a sphere shape or triangle shape. The spheres resemble large planets with a complex living system

contained within the surface. They are the builders of the Earth’s moon. The biosphere ship “Viera” typically stations itself behind the dark side of the moon.

The Andromedan Council has ordered all extraterrestrial presences to be completely out of Earth space. This will be interesting since there are over 18,000 grays and reptoids living in proximity or on Earth.

ANNUNAKI (Unpredictable)

They hail from the 12th planet in this solar system referred to as Nibiru, which is located somewhere beyond Pluto. This planet, unlike any other planet in our solar system, has an elliptical orbit and moves clockwise rather than counterclockwise. It is said that the collision of Nibiru and another planet in our solar system (Maldek) was what created Earth.

This planet is inhabited by the Anunnaki, who landed on Earth, and originally colonized it. They first came with the intention of mining Earth for gold and other minerals, and live a kind of idealistic society in a small colony. Before heading to Earth, the Anunnaki colonized the planets in the Orion star system.

In need of a workforce, they created e-hums (mankind). Through genetic manipulation and in vitro fertilization, they upgraded the genus Homo to sapiens quality. Present on Earth since our inception, the Anunnaki have influenced every aspect of human life. We've inherited their patriarchal culture of violence and vengeance, it's in our engineered DNA. The Anunnaki are in direct competition with the Draconians for control over mankind.

The Anunnaki's mode of operation is to leave primitive species such as humanity to flourish on the planet's surface while more advanced races such as the Reptilians form a 'planetary management team' to harvest humanity in a way

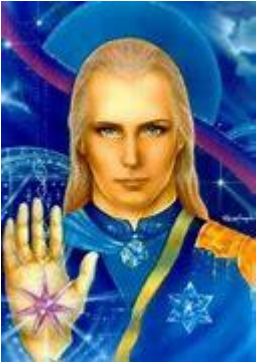

that serves the long term interest of the Anunnaki who return periodically to assess their 'human experiment'. It therefore appears that the Anunnaki form a kind of regulatory agent to ensure that the Earth's resources, and humanity in general, are responsibly managed.

The Anunnaki have a relationship with Reptilians based on whatever historical agreements they reached over humanity will be managed. It is likely that the Anunnaki have some form of agreement with the Draconians over how the latter intervene in worlds where the Anunnaki have established human experiments.

These 'agreements' and/or secret control of human elite groups indirectly make the Anunnaki a part of the global military-industrial-extraterrestrial complex.

ANTARCTICAN (UNPREDICTABLE)

This is a 'pure-bred' blond, blue-eyed Aryan race. There does not seem to be anything more than a peripheral connection between the Antarcticans, the Telosian and the Pleiadean 'blondes' (i.e. we will refer to the Antarcticans as the 'Aryans'; the Telosians as the 'Blondes'; and the Pleiadeans as the 'Nordics' in order to discourage confusion).

The Antarcticans consist largely of 'batch consigned' pure-bred blue-eyed, blond Aryans who considered themselves as a super race, and control through mind manipulation and implants.

There are factions of this species that have a joint Antarctic-Orion-Reptoid force that has spread terror through various sectors of the third dimension, conquering and committing untold atrocities against the peaceful inhabitants of other worlds. They call themselves "Ashtar Command" and will do the work for the highest bidder.

CETIANS - (or Tau Cetians) (Benevolent)

Sentient inhabitants of this region are a galactic humanoid and a bear-like mammaloid from the Constellation Hercules. Galactic humanoids closely resemble humans from Constellation of Hercules.

Three major skin colors: brown (including a copper tone), red, and green (light and dark). Brown-skinned humans have light brown to copper-colored hair, or black to red-orange hair. Eyes range from greens and blues to browns and grays. Males are very well-proportioned and 7-9 feet tall. Women are 6-8 feet in height. Green-skinned humans have light green to blonde or brown hair with green, hazel or steel-blue eyes, and are the same relative heights as brown-skinned humans. Red-skinned humans have red, orange or blonde hair with red, brown or dark blue eyes, and are also the same size as the other two types of humans. In all cases, females are quite buxom. There are also a tan-skinned humanoid race with slightly pointed ears, higher physical 'density' for their size, slightly broader nose, 5-6 feet tall, and often wear short 'Roman' or 'crew' style haircuts. They are generally found in the ranks of the Fleet.

Tau Ceti and Epsilon Eridani are said to be a major 'convergence' of exterran 'human' activity, and are said to be in alliance with the Pleiadeans and have 'Federated' alliances with the Vegans and the Ummites. The Cetian alliance with the Pleiadeans and 'other' societies who have been 'victimized' by the 'Grey' predators is based on a desire to establish a common defense against their reptilian nemesis. Known for their abilities to design some of most advanced ships in Galactic Federation's exploration fleets. Also considered some of best pilots and navigators in galaxy.

ARCTURANS (Benevolent)

The Arcturians are one the most advanced beings in this Galaxy with the ability for dimensional travel. Their society is a similar structure to that of earth. They work hard to bring peace among warring planets. This group of beings settled in the constellation of Arcturius.

They are very private, and only for very specific reasons do they get involved with Earth. They think of themselves as healers. They carry a strong pride of technology in the arts of physical healing, and emotional and spiritual bodies. They have been known to intervene in the ancient past to help resolve very serious conflicts in this Universe by sharing their unique ability to show others how to integrate their belief systems and feelings to resolve conflict. They can be very silent, and can and will keep very much to themselves.

The Arcturians' main activity is integrating spiritual values with advanced technologies, in providing strategic advice in transforming planetary systems, and inspiring humanity with the possibilities of extraterrestrial contact.

The global solutions the Arcturians contribute include: transparent and accountable global governance; integrating global financial, political and societal systems; helping humanity coordinate effectively with all extraterrestrial races, and diplomacy and conflict resolution. They strive for harmonic relations amongst humanoid species.

They are nominally peaceful and contemplative, but have such an overriding passion for exploration that they will frequently completely fail to respect the "rights" of others, if that other is between them and their goal, or if that other is the goal.

There were persistent stories among human abductees of the invasive procedures experienced during abduction experiences by Arcturians, but it turned out to be misidentification.

They never grow tired of verifying results, of collecting additional data for "further corroboration" no matter how many decimal places the data is already accurate to.

They have a spiritual demeanor and are working to bring humans to the fifth dimension.

ATLANS (Unpredictable)

The term 'Atlantean' or 'Atlan' is referenced to these races because they were once a part of the antediluvian 'Atlantean' empire. The present inhabitants have no direct genetic relation to the ancient 'Atlantean' society which is said to have controlled

and inhabited 'Atlanteans' simply because they are descendants of those who re-discovered and inhabited the ancient Atlan installations. The Atlans possess advanced aerial or 'disk' technology. The Telosians claim to have some connections with Atlans, especially where a sister city named POSID exists in a large cavern system.

BERNARIANS (Unpredictable)

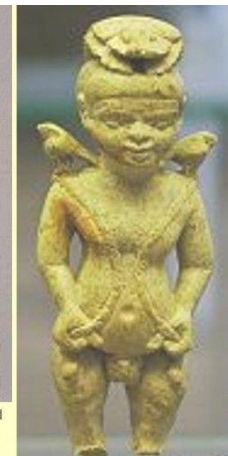

Inhabitants of the 'Bernard's Star' system. Although not much has been written about them. They tend to be very dark skinned and are similar in nature to the African Americans of Earth. They are 7-9 feet tall, very slender body, with thick, coarse black hair and very dark brown eyes.

It seems that they control this star system, along with "The Orange". They tend to be nomadic and warrior in nature. Whether the Saurians had any influence or not is uncertain.

DWARFS (Unpredictable)

The Dwarf races are human but average between 3 to 4 feet in height, although at times they have been seen as small as two feet. They typically live in subterranean systems to a large extent as a 'protective' measure. Some possess aerial disk technology and interplanetary travel capabilities. This species should not be confused with the small 'elementals' or 'nature spirits' of the magic realms which are ethereal in nature yet have the ability to appear in solid or semi-solid form at times.

Three statues of the dwarf god Pataeke/pataikos, son of Ptah

FELINES (Benevolent)

Originally Felines came from another universe. They are prominent in the Sirius Star System, but exist in other star systems as well. They evolved billions of years ago from quadruped cats to bipedal large cats.

Developed higher senses and fine-tuned psychic sensitivity as sentience rather than the use of physical tools. These bipedal cats have taken forms similar to Lions, tigers, Panthers, and Lynx or look more like domestic cats with variety of coloration. They can be anywhere from 3 to 8 feet tall. Some feline species were genetically mixed with humans and have half human bodies with cat features such as tails and feline facial characteristics. These were created from a group of feline genetic engineers. Felines of sixth dimensional and higher are energy beings no longer requiring what we perceive as physical form, but they can shape themselves to appear as their original feline form. They are highly psychic and telepathic, visionary, and advanced creators. They can attune to frequencies and mold energies to change environments with music, art, dance and theater among all other creative means. They are able to connect with other forms of consciousness and co-create with ease. These higher dimensional forms are often galactic travelers and are called upon to shift energies in environments and spark creative flow and psychic abilities.

FOMALHAUTANS (Unpredictable)

Fomalhautans hail from the constellation of Piscus Austrinus. There are two main races. A humanoid group from the Pleiades that first colonized Fomalhaut some 250,000 years ago, and who are now found on Fomalhaut's third and fourth planets.

A dinosauroid-reptoid group from Bellatrix in Orion, that colonized the second planet 200,000 years ago.

The humanoid closely resembles the "Nordic" type and are usually blonde with very blue, hazel or steel-gray eyes.

Men are muscular, and around six feet tall. Woman are very buxom and range from 5 feet, six inches to just under six feet in height. They are noted for prowess in all scientific endeavors

FOMALHAUTANS (Unpredictable) DINOSAUROID

The dinosauroid-reptoid type is darker-skinned and looks almost tanned, with dark hair and brown, gray or black eyes.

The dinosauroid-reptoid inhabitants are a hybrid originally from the star Bellatrix in Orion. Very scaly and bony. Upper head is surrounded by large bony crest. Large red or dull yellow eyes (resembling those of Earth's reptiles), are large and set forward just above, and to either side of, very small nose. Mouth has thin lips that run from one side of head to the other. Ears are non-existent: only sign of them is an extra-smooth 3-inch (7.62 cm) circle on either side of head and just behind eyes.

Skin is scaly like crocodile's and green, yellow, brown or red in color. Small crest of bony material runs up middle of back and is connected to larger crest found on the top of head. This Being is bi-pedal and very much like the Bellatrician race. Thin hand has six long, clawed fingers. Feet have five toes ending in small, very sharp claws. Very small tail, thick like crocodile's, extends only to feet. Male is shorter than female. Bellatrician-like males on Fomalhaut range from 8 to 10 feet in height: females are 8.5 to 10.25 feet tall.

GIZAN - (or Gizahn) (Benevolent)

The 'Gizeh People' have been referred to by the Pleiadians as well as others. They have some connection with the strange 'people' and technology allegedly encountered in deep labyrinth recesses beneath Egypt, who were sometimes reportedly seen by explorers, and who are said to dress like 'ancient Egyptians'. Some texts indicate that the 'Giza People' may be a 'controlled' society with the reptilians being the dominant power, although there is still much mystery as to what the "Gizeh Empire" is all about.

HAV-MUSUVS - (or Suvians) (Benevolent)

The Hav-Musuv were allegedly an Egyptian -like sea-faring race who play prominently in Paihute Indian tradition. They originally came from the Sirius regions.

When the inland sea (now Death Valley) which connected the ocean in ancient times dried up, they had no way to carry on trade with other parts of the world. As a result of this, according to Paihute Indian tradition, they began to build and fly 'silvery eagles' which became increasingly advanced as time went on.

They established interplanetary and interstellar travel, exploration and colonization. This huge facility is now operating as a major Federation base on earth, and possesses huge chambers with differing environmental, atmospheric and even gravitational conditions to accommodate the various visiting Federation dignitaries.

HYADEANS (Benevolent)

The Hyades in the constellation Taurus, like the Pleiades and Vega, are said to have been the destination of yet another group of refugees from the ancient Lyran wars. It is believed they are identifiable by a darker, blue mottled skin.

IKELS (SATYRS) (Malevolent)

Small hairy humanoids with cloven hooves. They are members of a fallen pre- Adamic race which possessed angelic, animal and humanoid characteristics. Now allied with the reptilians. They have been known, according to natives, to 'kidnap' women and children down through the ages.

JANOSIAN (Benevolent)

This is an ancient human being from the ancient home world planet 'Janos'. They are said to be like Terrans, although somewhat oriental and slender. A group of refugees is said to have left Janos centuries ago in a huge carrier vessel of roughly donut-shaped configuration after an asteroid or meteor shower devastated the surface of

their planet, causing a chain-reaction in their nuclear power grid, with a fallout of deadly radiation into the atmosphere and onto the underground tunnels and 'cities' which they had built beneath Janos.

KORENDIAN (Benevolent)

Humans allegedly living on a colonized planet known as 'Korender'. Perfectly 'human' in proportion yet 4-5 ft. tall on the average. The Korendians claim alliance with the Arcturians and are part of a massive collective Alliance of worlds who lean more to non-Interventionism than to direct Interventionism.

LEMURIANS (Benevolent)

Lemurians are a humanoid species that hail from Pleiades. They are humanoids, dark hair and olive skin, usually brown almond-like eyes and supposedly settled in India and other areas of the middle east. They are supposedly here to enlighten the consciousness and traveled here many millennium ago because of the vibrant natural resources of what they call Terra.

LYRAN (Benevolent)

It is appropriate to begin the discussion of these extraterrestrial races and their main activities by focusing on a star system that has been described as the source for the spread of human civilization in the Milky Way galaxy, the constellation of Lyra. The human inhabitants of Lyra who are said to have a common origin with Terran humanoids.

They come in all shapes, sizes from dark-skinned to Caucasian there is supposedly a red haired, light skinned giant race, with rather large features. The "Swiss" Plejadians originated in a far sun-system in a star group near what we now know as the Ring Nebula of Lyra, for which they have been called Lyrians. These early Lyrians in their numerous migrations in their great Space Arks went to many other star systems and found suitable habitations, and put down colonies, such of which flourished and eventually launched their own space travelers. They were driven out of that system several thousand of years ago. Draconian texts state that some of the present day inhabitants of the 'Lyra' constellation may be of reptoid descent. During the Lyran wars, a mass exodus' of humans reportedly left the system and escaped to the Pleiades, the Hyades [which are 130 light-years from earth in the Taurus constellation], and to Vega which is also in Lyra. This region, like our own system, may still be a 'battleground' between saurian greys and humans.

Due to the Lyrans role in the genesis of the human presence in the galaxy, the Lyrans can understandably be argued to have the most detailed understanding of human origins and galactic history. They can be described as the 'Galactic historians' for the human species. It can be inferred that the Lyrans help in disseminating the truth about the evolution of human races in the galaxy, and have a deep understanding of galactic human culture and of the 'human spirit'.

Those from Lyra have an affinity for origins and ancient histories. So they would be useful to you to understand the past in order to transform it. As you understand your past and your origins you may be able in consciousness to go back, pattern by and pattern, peel off the layers of the onion, and find your true nature. They would be excellent guides in this process, this psychological process for humanity, of understanding its motivations and its history and how it came to be.

The Lyrans' main activities are in disseminating the unique history of the human race in the galaxy, and assisting in understanding human motivations and potentials. The global solutions the Lyrans provide include accurate information about human history, understanding galactic history, discovery of the human essence, diplomacy and conflict resolution, and global education.

MARTIANS (Unpredictable)

Originally they were Inhabitants of the planet Mars, both human and non-human, including the alleged inhabitants of the two Martian 'moons' (which many believe to be artificially-hollowed asteroids, one of which -- Phobos -- is said to be under the control of the "original" Greys, or self-reproducing Greys which are the "hosts" for the Grey "clones" which operate from various space stations that are disguised as planetoids.

(It is from these "carrier" ships that the abduction, implantation, programming, mutilation, infiltration and other projects are carried out against planet earth). It has also been suggested that thousands of years ago the surface of Luna and Mars were much more 'habitable', that the surfaces of these bodies may have been decimated after passing through the asteroid belt or an 'asteroid storm' (consisting of debris which 'may' have been torn from a planet which apparently existed between Mars and Jupiter at one time. It is believed that ancient 'ruins', possibly thousands of years old, have been seen on both 'planets' and that these attest to such a cataclysm.

MOON-EYES (Benevolent)

A race of peaceable humans some 7-8 ft. tall, with pale-blue skin and large 'wrap-around' eyes which are extremely sensitive to light. They are allied to the 'Nordics' and/or 'Blondes'. They claim to be descendants of the Annunaki Noah.

PEGASIANS (Benevolent)

There are three major types of humanoids located in the constellation of Pegasus. They are noted for their prowess as innovators, scientists, and diplomats. The first type strongly resembles the Sirian human in height and appearance and is divided into the same white and blue skin types.

The second type is a thinner human type with red or orange skin. The final type is a hybrid formed from the dinosauroid and second humanoid race. The first type resembles that of the original Sirius B humanoid colonists: the men vary from perfectly formed muscular physiques to child-like bodies, and are 6 feet, 6 inches to 7 feet, 4 inches in height, with blonde to light brown hair and light blue to green-colored eyes. The women are extremely voluptuous in appearance and are 6 feet, 2 inches to 6 feet, 8 inches tall.

They have either extremely pale white or light blue skin. The second humanoid type slightly resembles the first in height and/or body types, except for two major differences. First, the skin, as well as the hair, is either a light red or a dark orange in color. Second, the eyes are more cat-like in appearance and the iris is either red or a dark blue. This group originally came from some of the more distant stars in the Lyra constellation.

The hybrid third type has a scaly type of skin with more pronounced cat-like eyes that are either red, brown or pale yellow. The body, legs, neck, and arms are more muscular than a human and have a number of thick vein-like protuberances running their length. Each hand and foot ends in 4 thin, long fingers or toes, with a small claw at its end. The males are some 7 to 8 feet in height, while the females range from 6 feet, 10 inches to 7 feet, 7 inches tall.

PLEIADEANS (Benevolent)

Pleiadeans are from the Alcyon System. Usually tall and human looking, Pleiadians have been described as the other humanoid race of the universe with varying hair and eye and skin colors, One species is luminous blue skin with a thick wooly red hair.

Most are blond, but in some cases brunette 'Nordic' type humans based in the Pleiadean 'Taygeta' and other systems, which were allegedly colonized by refugees from their former planetary abodes in the Lyra constellation which were invaded by reptoid entities from Alpha Draconis. The main Pleiadean planet of 'Erra', was reportedly 'Terra-formed' by the Lyran refugees.

The Pleiadeans were apparently the first 'humanoid' society to develop hyper-space travel. The Pleiadeans claim that their technology surpasses 'International' technology by about 3000 years. This may explain why the humans in Lyra were able to travel the vast distances from this part of the galaxy to colonize the Pleiades, some 430 light-years from Terra-Earth. The Pleiadeans consider themselves to be part of the "ANDROMEDAN COUNCIL" based within some of the planetary systems within the Andromeda constellation.

The ancient history of the early Pleiadian ancestors described how they came to travel to the Pleiades and how a much earlier migration to this solar system failed. The one third survivors of the Pleiadian ancestors' original planet, after its devastation, evolved a new technology, and designed and built the great-spacer evacuation arks in just 900 years, and began to launch them everywhere for many hundreds of years more.

The extraterrestrials visiting Switzerland are the descendants of one of those space arks which occupied one of the three planets engineered for human habitation, in one of the sun-systems in what we call the Pleiades today. They have experienced great gains and great losses many times over since that time. In a very real sense, we are descendants of their earliest colonists attempting to settle in this solar system, together with an assortment of aborigines and human exiles from a number of places.

Their lifespan is 3000 Earth years. They are 7-8 feet tall

Their ships are either oval or round shapes,

PROCYONS (Benevolent)

There are two types of sentient Beings. The first is a pure Lyran-Sirian humanoid type. As on Sirius-B, they are either blue- or white-skinned and are fully conscious. Amphiboid-Reptoid hybrids are slightly taller than humanoids and have green-, brown- or blue-colored skins. Most of the Rigelians who fled their planet traveled to the star system of Procyon to restart their civilization.

Procyon is a binary star system about 11.4 light years from Earth, and it was apparently the fourth planet in this system that the Rigelians established their new colony. There was an eventual takeover of Procyon by the Grays and the enslavement of most Procyons that did not escape.

Using advanced time travel technology which involved 'multidimensional consciousness', something which the Grays apparently could not duplicate due to their degraded genetic bodies, a significant number of Procyons were able to escape and began a liberation war from the 'remote corridors of time'.

The humanoids of Procyon are typical Lyran-Sirian in appearance and look like typical Earth humans, with two major differences. First, eyes are much larger and appear more alive: color ranges through shades of blue, green and brown. Two smaller ears are attached slightly lower on head. Second, top and rear of head is enlarged to accommodate a larger brain capacity. Like other Lyran-Sirian humans, males are about 6 feet to 8 feet in height. Well-proportioned females are 6 feet to 7 feet in height.

Amphiboid-Reptoid hybrid Beings possess a lizard-like body covered with scaly skin. Bulgy brown, yellow or red eyes are set far apart from very thin ridge-like nose that ends in two small slit-like nostrils. Eyes can move independently of each other. Ears are small 2-inch (5 centimeter) ovals set just behind each eye. Mouth is thin slit that runs from ear to ear. Almost round head is well-proportioned to rest of body. Small, well-defined neck. Very muscular body and appendices. Four thin, nail-less fingers. Three long toes end in long sharp claws. Very small tail looks like bump at base of spine. Slightly larger females range from 7 to 8 feet tall. The males are more compact ranging 7 feet in height

RIGELIANS (Unpredictable)

One of the many human space colonies spawned by the Lyrans that was eventually established on planets in the Rigel solar system in the Orion Constellation. At some point in its history, Rigel with its Nordic population presumably underwent a destructive civil war and was taken over by Grays.

Their lifespan is 500 Earth years. Their ships are cigar shaped. The ancestors of the short Grays were once tall Blonds. Before the great war, Rigel was a vast empire, which had been the source of most galactic seeding. All Rigelians were tall Blonds. A colony had already been established on Procyon. The Great War was a civil war of Rigelians versus Rigelians, and lasted the equivalent of three Earth centuries. A group of Rigelians who realized that the Great War was about to break out took off for the Procyon colony in crude, clandestinely built ships.

They were the only Rigelians to escape the cataclysmic devastation. All those who had remained on Rigel were transformed into short Grays. It appears that Rigel underwent a planet wide nuclear war and environmental collapse that led to life in underground shelters. It is very unlikely that the transformation of Nordic Rigelians involved them becoming 'short Grays' whose genetic material is generally accepted as inferior to human races such as the Nordics.

The genetic mutation process would have taken much longer than the three centuries mentioned. It is more likely that the surviving Rigelian Nordics were incorporated into a planet wide genetic hybridization program by 'short Grays' from a star system such as Zeta Reticulum who had covertly infiltrated and undermined Rigel prior to and/or during the Great War on Rigel.

The short Grays most likely succeeded in genetically engineering the 'Tall Grays' using genetic material from the Nordic survivors who were too weak to resist the Gray hybridization agenda. These Rigelian 'tall Grays' subsequently play a key role in diplomatic initiatives by the Grays and serving as a genetic model for new human-Gray hybrid races that allegedly represent the best of both species

SASQUATCH (Unpredictable)

Originally known as “Kunundai”(Annunaki name) or “Hirsute”, they were brought to Earth as slaves during the Annunaki reign from the Bootes System. They possessed great strength but proved to be unmanageable in large groups.

They can manage short bursts of interphasing, which allows them to appear as though they vanished. They were eventually replaced by e-hums. Large, hairy 'humanoids' who are usually troglodytial or cavern-dwellers, although they have been known to forage through mountainous or wooded areas on the surface in search for roots, berries, grasses and nuts which make up their diet.

They are believed to possess a heightened 'sensing' ability which allows them to steer clear of 'human' influence. They are more human than animal according to some reports although they have often been mistaken for animals, which has forced them to take up a largely subterranean lifestyle. They have often been described as having a human face on an 'ape-like' body.

They are mostly strict vegetarians, which may be explained by the possibility that they MIGHT be a 'hybrid' or 'hubrid' between antediluvian humans and Sapiens. Such interbreeding, if possible back then, is certainly not possible in modern times due to increasingly divergent genetic strains between the two groups.

Most Sasquatch have a human soul-matrix. They are usually described as being 7-9 ft. tall, while other branches may be smaller. Sasquatch have been known to attack humans in self-defense (sometimes throwing large boulders to frighten intruders away). There is a possibility that other entities, possibly more animal than human, are the result of humanoid-Sasquatch and nonhuman-Sapien interbreeding or genetic manipulation, in which case the offspring might be more human OR beast in nature.

SIRIANS A (Benevolent)

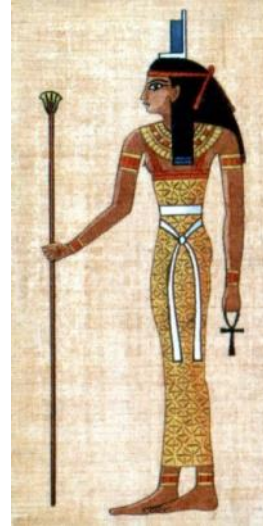

Sirius A is a blue white star that is approximately 8.6 light years from Earth, twenty times brighter than the sun, and is the most brilliant star in the night sky. In contrast, Sirius B is a white dwarf sun that ranges between 8 to 32 astronomical units from Sirius A in a highly elliptical orbit.

The race of beings on Sirius A, are called the Katayy. They are considered benevolent. Many of these races display red-skin. Their ancestry is some of the first Lyraens that escaped with the women and children during the war. In their oceans they have whales, octopus and sharks. They are a race that is artistic. They have music and are connected to nature. They are builders and not very political. Their governments are based on "spiritual technology," which uses sound and color. Their lifespan is generally 2000 Earth years. They tend to be 7-9 feet tall. Well built muscular bodies. Some have an enlarged cranium.

The racial characteristics of the Sirians suggest that they were originally colonists from Vega. If the Sirians were originally Vegans escaping some cataclysmic interplanetary war in the constellation of Lyra, then it might well be understandable how they developed an interest in building, since the building of a new civilization on new world in the relative young star system of Sirius A, would have been an urgent requirement.

Their ships are generally diamond or triangular shape.

SIRUSIANS (Benevolent)

Humans from the home world of Halexandria in the Sirius Star System. They were also known as Ra-Ans. They were responsible for the Egyptian and Mayan civilizations. Sirusians use sound and color as a 'spiritual technology' which suggests that they specialize in terraforming planets and making them suitable for the evolution of life by altering the 'bio-magnetic energy' grid. They were supposedly the first species to come to earth and taught humankind the ability to grow crops and organize in communities.

They are connected to the Phoenicians, Egypt and referenced in the Bible.

SIRIANS B (Benevolent)

Hailing from the Sirius B star system, the Sirians are as advanced as they are ancient. Throughout history, they have imparted their knowledge to human

civilizations of their choosing. They gifted the ancient Egyptians with medical and astronomical information and the great pyramids and temples are said to have been built with their help.

The Mayans also had a special relationship with the Sirians, who shared information with this enigmatic South American civilization. The extraterrestrials originating from Sirius B are believed to have played a part in the disappearance of the Maya. They are accredited with leaving behind amazing artifacts such as the crystal skulls.

Another earthly civilization that benefited from the Sirian presence were the Atlanteans; it is believed that during the cataclysmic event that sunk Atlantis, the Sirians were instrumental in leading the rescue operations. Other civilizations have been influenced by the Sirians, the most notable case being that of the Dogon tribe of West Africa.

Although they were more involved during Earth's past, the Sirian's supposedly play a more subtle role through technology exchange programs. They are often mentioned in connection with covert or exotic weapons research as well as time travel experimentation. Sirius is the epicenter of the ASHTAR or ASTARTE collective, where various humanoids have collaborated in the past.

The Sirians have waged war in the past with the Orion Empire or the "Unholy Six" reptilian star systems in the Orion open cluster. The ancient dispute involves just who will serve as the "landlords" of a sector of space containing 21 star systems including the most strategic star system, SOL and particularly planet Earth, Terra or Shan, which is a virtual cosmic "oasis" of water, mineral, plant, animal and genetic resources in incredible variety compared with most other worlds.

This dispute between the Sirians and Orion Reptoids dates back to the ancient invasion of Orion by the Draconian Empire, as a result of which many "Nordic" type humanoids escaped to Procyon, Sol, Sirius and elsewhere. In recent times a rift has occurred in the Ashtar collective following the discovery of massive infiltration into the collective by agents of the Unholy Six and Draconian Empires, with many humanoids taking sides with the Federations and many of the Reptoids taking sides with the Orion-Draconian Empires.

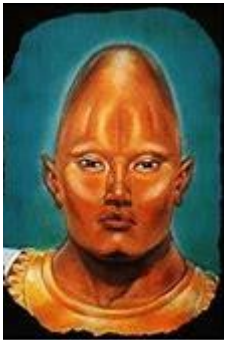

This war in Sirius-B is gravitating towards the Sol System, in that the opposing agendas for this system is one of the major issues of dispute between the two [or three] warring factions.

SOLARIANS (Benevolent)

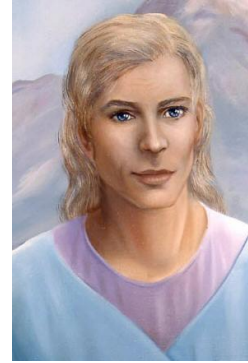

Human residents of the 'Sol' System who claim to have ties with ancient Terran societies, especially subterranean societies which developed off-planet travel early on and established underground bases and colonies on various planetary bodies in the 'Sol' system, including the Jovian moons and the Saturnian moons on or under which they have allegedly established a 'Tribunal' center for the federated Solarian planets.

TEROS (Unpredictable)

A term describing various human groups who inhabit the cavern systems and re-established antediluvian cities. Many of these are descended from older civilizations such as ancient native Americans who went underground hundreds and/or thousands of years ago. The nemesis of the Tero are the 'dero', which consist of draconian or reptilian controlled elements.

TELOSIAN (Unpredictable)

Tall, blond inhabitants of a re-established network of antediluvian colonies throughout the star systems. They are sometimes referred to erroneously as 'Lemurians'. They have loose contact with the Pleiadeans and other groups via ancient ancestral ties, since the Telosians possess interstellar vehicles, and are a western branch of the sub-International AGHARTI network and it's "Silver Fleet".

The name 'Telos' is a Greek work meaning 'uttermost' or 'purpose', yet some of the inhabitants refer to ancient ties with neo-Mayan tribes, and therefore many of them 'may possess a Greco-Mayan ancestry. Some ancient Vedic texts speak of a collaboration between the Greeks and the East Indians -- who some believe gave rise to the Mayas -- in the development and construction of aerial craft called "Viminas".

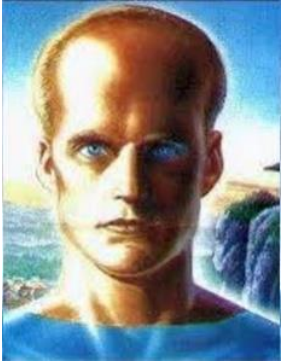

Telosians are part of a "Melchizedek" spiritual order with connections to the Ashtar collective-mind and have dealings with extraterrestrials in Arcturus, Sirius, and Saturn as well as with other-dimensional beings.

TIMMERS (Benevolent)

Timmers are ninth dimensional Light beings. They are members of The Council of Light -- ninth dimensional consciousness region. They are golden haired, with golden skin that emanates a golden aura. They stand between 8-10 feet tall, with a statuesque body form. They are telepathic only. They are cultivators of art and music.

UMMITES (Benevolent)

Humans from the area of Wolf 424, some 14-plus light years distant from the Earth-Sol system, and possibly having ancient ties with the 'Lyrans' colonies in that the Ummites (from the planet Ummo) are like the Lyrans-Pleiadeans said to be 'Scandinavian' in appearance, and therefore may tie-in with the so-called 'Nordic' or 'Blond'

societies. They reportedly work closely with the Vegan humanoids. The Ummites assist in global solutions surrounding the transformation of scientific paradigms, development of environmentally friendly technologies, and educational reform.

VEGANS (Benevolent)

Relatively peaceful and gentle humans descended from refugees from the 'Lyrans Wars', who work closely with other refugee-colonists now living in the Pleiades, Wolf 424, and elsewhere.

The Vegans are a darker or 'blue' skinned group of humans, and were likely the 'blue race' of advanced humans mentioned in various Vedic texts, and from whom the Hindu gods Vishnu and Krishna derived. The Vegans played an important colonizing role throughout the Galaxy.

VENUSIAN (Benevolent)

Allegedly inhabited by physical entities, both human and reptilian, are subsurface dwellers and therefore safe from the extreme surface conditions. Originally colonists from Terra, who somehow were able to phase or generate their physical bodies molecular structure into a 4th dimensional existence wherein they now allegedly survive unaffected by the harsh physical conditions. Other surface colonies allegedly exist in "biodome" cities, whereas still other reportedly live in the "antimatter" counterpart of "Venus" - - which in the "alternate" universe is part of a 12-planet alliance called the Koldasian alliance. The Pleiadians also claim to have colonized the "anti-matter" universe, which they call the DAL universe

INSECTOID SPECIES

Insectoids are races which share many similarities with Earth arthropods, such as multiple limbs, insect-like mandibles and an exoskeleton. Sometimes they will also have compound eyes and antennae. It is possible for a species to be both insectoid and humanoid, as bipedal insectoids with only four limbs often have a fairly humanoid body plan.

MANTIS OR ATAIEN (unpredictable)

Lifespan is 5000 Earth years. The most striking aspect of the Mantis alien is its physical kinship with the praying mantis, the carnivorous and bipedal insect of its namesake. These beings are 6-7 feet tall, with long, thin torsos. Their necks, arms and hands have additional joints. Their heads are insect-like and triangular, with large, slanted eyes of deep brown to black.

Most Mantids are described as dark brown, but other colors such as green and black have also been encountered. Their bodies are composed of a segmented exoskeleton, and it appears they are coated in an oily substance.

These beings have big bug faceted eyes and thin bodies. They have been described as being and usually accompanied with small neonatal types of dark-skinned greys. They are very malevolent towards humanoids and benevolent towards Serpents and Reptilians. There are also several other insectoid species that resemble ants, beetles, and arachnids that are extremely dangerous to humanoids.

Mantis are often encountered wearing long robes in a variety of colors, perhaps signifying rank, while some are unclothed. They are often found in the service of the Dracos. Mantis tend to communicate using telepathic messages, but they communicate with one another using an auditory language of clicking sounds. Mantis are known to be shape shifters and use advanced technologies to create a field around their bodies to make them appear human.

Mantis tend to be overseers, and often appear to be in leadership positions of power during an abduction. Generally, a Mantis will be accompanied by several small grey aliens who seem to do its bidding. These small Greys are assumed to be drone beings, controlled by a hive mind and utilized by a variety of alien races.

ANT (unpredictable)

The Ant people lived in ancient Egypt during Akhenaten's reign. They have an elongated head, a yellow to reddish brown body, and a darker abdomen with a stinger. They have spindly arms and legs, thorax, and abdomen.

They converse using audible clicking sounds, otherwise they are

telepathic. They are part of an ancient civilization. They spent time amongst the Hopi Indians. The Ant People escorted the Hopi into subterranean caves where they found refuge and sustenance during great cataclysmic events.

NON HUMANOID SPECIES

Any entity displaying some, but not enough, human characteristics to be considered a human. The term has been used in a variety of contexts and may refer to objects that have been developed with human intelligence, such as robots or vehicles.

BIOSYNTH (unpredictable)

Human organisms that have been constructed with synthetic materials and robotic gear. They tend to be 10-12 feet tall with superior strength, agility, speed, and aggression.

They come from another Universe. Their life span seems to be 5000 Earth years. That have no emotions.

They are mercenaried to the highest bidder as killing machines.

SILICON (unpredictable)

A Crystalline elemental silicon cosmic humanoid form from another Universe with alpha-particle absorption, that can withstand extremely high temperatures. They have a major effect upon electronic devices. They tend to be highly evolved with technology.

They tend to be highly developed, but contain a hive collective. They emit a brilliant white light during communications.

They tend to be 9 feet tall, very slender and fluid in motion. They appear to have an eternal lifespan.

GOLD BEINGS (BENEVOLENT)

Pure light energy in a humanoid form. They come from higher dimensions. They are observers and will not intervene in situations. Many times they are seen as orbs floating.

GOLD TRIANGLE BEINGS (BENEVOLENT)

They currently belong to the sphere being alliance. Previously they sat on the Federation Council as Guardians.

They are kind, gentle, and help humanities transition to higher states of being in the fifth

dimension. They are approximately 9 feet tall with very rail thin bodies. They are the embodiment of Service to Others. They are ninth dimensional beings.

SYNTHETIC (unpredictable)

This is a combination of artificial intelligence (AI) and biology in a living robot.

This being comes from another universe. They have accelerated

understanding and complex thoughts. They have complex language and speech processors. They are agile, quick, strong, and complex task oriented. They have an array of emotions at their disposal. They excel at math, science, and engineering. Their ships are translucent spheres with an interior cube. They are approximately 6 feet tall.

ARCTURANS (Unpredictable)

Arcturians are a highly sentient mammaloid species from the star Arcturus in the Constellation of Bootes that closely resemble a horse.

The body is tall and slender with a stylized horse's head. The skin ranges in color from a vanilla shade to a very dark brown. Arcturians possess a mane on the back of the neck and head and an extremely thin tail that is only slightly reminiscent of that of a horse.

The hands end in 4 fingers that are very long, supple and extremely thin. The arms, legs and body have a very muscular appearance. The Arcturian's eyes are much bigger than those of Earth humans and are either pale blue or dark brown in color.

The ears somewhat correspond to those of a horse, but they are smaller and more rounded than those of their earthly counterparts. In size, Arcturian males range in height from 7 feet to almost 8 feet 6 inches. Females vary from just below 7 feet to about 8 feet 2 inches tall. In the Galactic Federation, Arcturians are noted for their mastery of time (galactic calendars, etcetera) and their exceptional abilities in science and philosophy.

TAU CETI (Unpredictable)

Bear-like mammaloids of Tau Ceti are huge, furry Beings with small furry tails and bear-like bodies covered in brown, black or blonde fur. Heads are bear-shaped but with a smaller muzzle. Teeth resemble those of a galactic human rather than of an Earth bear. Eyes are set forward and, like those of humans, are brown, blue or black.

Ears, at the side of the head just above the eyes, resemble those of Earth's bears. Highly sentient Beings walk on two legs, hence have a higher center of gravity than bears on Earth. Two muscular arms with paw-like hands containing five stubby claw-laden fingers. Very muscular legs end in very short feet with five stubby toes. Range in height from 9 to 12 feet.

DRACS AND REPTOID SPECIES

According to the ancient texts, there was a conflict with other beings, in which the ELs [human giants] destroyed most of the Reptoid civilization, forcing many of the reptoid into deep caverns and others to venture out to the stars. They fled back to Alpha Draconis and/or Altair in the constellation Aquila, which in ancient lore was associated with evil reptilian creatures. The conflict was a Species War, between the Evadamic Seed and the 'Serpent' (draconian) Seed.

There are many different theories as to where the Reptilians actually come from. While some theorize that they were here on Earth before humans, they were in fact from the Alpha Draconi star system of the Orion Constellation.

A long time ago the reptilians dominated the universe, but by now they have long been surpassed by civilizations that have followed the path of enlightenment. They work together in unity in their spiritual and technological development, and have combined their forces throughout the entire universe. This made their control of energy, and so their technology and their weapons (which they only use in defense), so much better than those of reptilians and other negative species, that they are not in danger from them anymore.

The collaboration amongst negative species is much smaller, because they often mutually distrust and hate each other. However, this doesn't stop them from causing death and destruction on planets that aren't as far in their development. To them, not spiritual development, but military force determines the hierarchy. This behavior continually violates the Universal Law of Non-Interference, but since every living creature was given *free will* by the Universal Source, they continue doing it.

There are a variety of Reptilian species that are non-hominid, bipedal and cold blooded. There have been rare reports of a positive interaction with them. Descriptions vary, but a commonality seems to be the reptilian features of greenish grey reptile flesh colored skin with eyes that have slits. They range in all heights as well, including tails and sheaths which hide their sexual organs. While the majority of species tend to perpetuate malevolent agendas, there are sects of Reptoids that have moved past the typical reptilian traits to seek a more enlightened and benevolent status.

The Reptilians or Reptoids alien race (which is a word mixed from reptilians and humanoids and are the same creature) are human looking lizard creatures that can shape shift. They are also known as lizardmen Saurians alpha draconians, and Sauroids.

Most Reptilians are tall, around 7 to 9 feet, have green scaly skin, three long fingers and an opposable thumb with talons on the ends, holes for ears, muscular legs and arms, and large eyes. There have been reports of Reptilians with and without tails, with and without wings, and hidden genitalia. They have been sighted wearing very little clothes except for armor but are always seen with some sort of utility belt said to be used to help them become invisible.

Although there are also positive reptilian civilizations that evolve spiritually, the negative ones are infamous for their malice and aggression. The aggressive species has stopped developing. An adult reptilian is a 13-foot tall, physically and mentally very strong, completely telepathic, incredibly fast and intelligent. They can live for thousands of years.

The aggressive Reptilians are a very dangerous species that are bent on the domination of planets. They have telekinetic powers and have a warlike mentality that has driven them to secretly incorporate themselves into societies for their cause.

Reptilians live in both the third and the fourth dimensions. The fourth dimension is referred to as "hidden spaces and planes unknown to man", in the ancient Emerald Tablets. They can switch back and forth between these dimensions, but require help to accomplish this. A special characteristic they have is that they can change form. This is usually referred to as "*shapeshifting*". They can carry a human DNA package, which they can transfer to whenever they wish. This transforms them from large reptilian creatures weighing hundreds of pounds into a human being of not even two hundred pounds. The DNA dictates energy, and can allow every organism to change from one form into the other at will.

Reptilians can easily shift shapes due to humans carrying the ancient reptilian genes. This is because our humankind *homo sapiens* was created a long time ago by the alien Anunnaki in South Africa. They mixed their own half-human/half-reptilian DNA with the native Lemurian DNA. The oldest part of the human brain consists of the so-called "reptilian brain" and the human embryo looks like a small reptile (including a tail). To shift shape in a satisfying manner reptilians require human flesh, blood and anxiety-energy regularly. Reptilians that don't carry human DNA use other techniques to shift shapes. A portable device is used to create a hologram solid enough to appear like a normal human being.

Because the reptilian is their true nature, it's not always easy for them to remain in their human form. Especially when anger or excitement are involved it requires great effort for them to keep control and you can sometimes see the first phase of transformation shine through via their eyes or skin. Their eyes get elongated pupils and their skin becomes green and scaly.

ALTAIRIANS

(Malevolent)

Reptilian inhabitants of the Altair stellar system in the constellation Aquila, in collaboration with a smaller Nordic human element and a collaborative Grey and Terran military presence. Headquarters of a collective known as the "Corporate", which maintains ties with the Ashtar and Draconian collectives.

ANTARIEANS (Unpredictable)

This species falls into both the gray and reptoid categories. This species has reptilian qualities, with slits instead of regular pupils and eye colors ranging from pale yellow to bright green more in tune with a cat or snakes eyes. It is said they

may be a pure Aryan race and display a swastika on their round ships. Over the last 10,000 years several of their species have undergone an evolutionary process making them more reptilian in appearance.

BELLATRICIANS (Malevolent)

They hail from the Star Nation Bellatrix in the Constellation of Orion. This reptoid species is very scaly and bony. Upper head is surrounded by large bony crest. Large red or dull yellow eyes (that resemble those of Earth's reptiles) are set forward just above, and to either side of, very small nose.

Mouth has thin lips that run from one side of head to the other. Ears are non-existent: only sign of them is extra-smooth, 3-inch circle on either side of head and just behind eyes. Skin is scaly like a crocodile, and green, yellow, brown or red in color. Small bony crest runs up middle of the back and is connected to larger crest found on top of head. They are bi-pedal. Thin hand has six long, clawed fingers. Feet have five toes ending in small, very sharp, claws. Very small tail, thick like a crocodile's, extends only to the feet. Male is shorter than female. Males range in height from 8 to 10 feet: females are 8.5 to 10.25 feet tall. They are noted for great diplomatic and leadership skills and have been in charge of all the former Alliance's forces for this sector of the Milky Way Galaxy for past six million years. Their ships are cigar shaped. Their lifespan is 1000 Earth Years.

BOOTEANS (Malevolent)

Reptilians from the 'Bootes' system. These and reptilian entities from the 'Draconis' system are allegedly involved with the infiltration-implantation-control of human society on earth in anticipation of their planned takeover at some point in the future (Draconian text).

DRACONIANS (Unpredictable with Malevolent Tendencies)

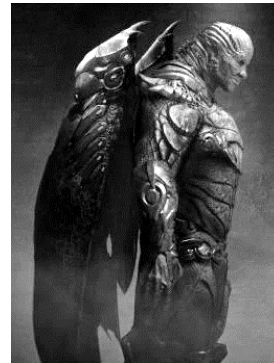

The Alpha-Draconians are a corrupt and vicious civilization that infiltrated humanoid societies tens of thousands of years ago, and are the oldest known reptilian race in the galaxy's.

The Draconians are the force behind the repression of human populations everywhere in this galaxy, instilling fear-based belief systems and restrictive hierarchies. They are extremely clairvoyant and extremely clever, and they can also be extremely sinister. The Draconians view themselves as the first intelligent species to evolve in the Milky Way galaxy.

They are competitive and expansive and have populated many worlds. They have immense egos and believe they are the rightful rulers of lesser evolved worlds. Their continuous exploitation of the humanoid races proves they consider humans inferior species.

Reports say there are actually three types of Alpha-Draconians divided into two castes: the giant ones are part of a royal caste called the Ciakar while the smaller ones (8 feet tall) form a well-trained warrior class.

Alpha Draconians - Ciaker

The Alpha Draconians are reptilian beings that have established colonies in Alpha Draconis and have imperialistic agendas. Like all reptilians, these claim to have originated on Terra thousands of years ago. The alphas tend to be fairly large in stature being eight to twelve feet tall and very muscular.

They possess some human features through the face, but retain the sharp pointed teeth and long reptilian tongue. The female of the species are not winged. The males tend to have large, leather-looking wings. They are a major part of a planned 'invasion' which is eventually turning from covert infiltration mode to overt invasion mode. This has always been foretold as the time span before International humanoid society becomes an interplanetary and interstellar power.

They have attempted to suppress advanced technology from the masses, which would lead to eventual Terran colonization of other planets. These reptiles are unfriendly towards all humanoid species.

Alpha Draconians – Ciaker continued

They are an extremely muscular, giant, reptilian species, measuring anywhere from 14 to 22 feet tall and weighing an estimated 1,800 pounds. Over time, this species has developed some humanoid characteristics through the face.

These Alpha-Draconians have black leathery brown scale bellies, sometimes whiskers along their chin and jaw line and have multiple abdomens. They are an intelligent race, devoid of emotions, with large heads and reptilian eyes. Some accounts describe them as having tails or even wings. Some of this species has evolved over centuries to depart from their war like ways and walk an enlightened path.

They lay eggs and use a “battle hormone” to accelerate the birthing process. They are a duality. This is why ancestral females do not participate in war because there wouldn’t be help with the eggs. They also have to be there to secrete their hormone.

ROYAL DRACONIANs

The Royal Draconians are imperial reptilian beings who have undergone a series of evolutions to drastically change their appearance. They are much like the Alpha Draconians in stature and structure, but their facial features are much more human prominent with developed ears. In their beginnings they were characterized by a prominent protruding mouth

and proboscis. Many of the royals no longer have wings. Their lifespan is 1000 Earth years and their ships are cigar or circular shaped.

White Super Draconians

The White Draconian is an upgraded evolved version. They are telepathic and mind invasive. They are known for raping a victims mind. They stand between 14 and 16 feet tall, covered in white scales. They have long fingers ending in claws and a large set of wings much like a bats. Their head is small in comparison to their large, muscular body. They have a

protruding nose and mouth, with rows of sharp teeth. They have large yellow slit eyes. They are aggressive and lethal.

WINGED WAR DRACONIANS

Winged Draconians are between 10 and 12 feet tall, with dark reptile scales, ranging in color from green to brown to black, with elongated hands and thick black talons on 4 fingers. Their features are large, pointed, and angular, with large slit pupil reptile eyes and extremely muscular

bodies. They are very dragon like in appearance. They have the ability to shape shift to propagate. They are hostile in nature. They have been known to manipulate and invade dreamscapes. They feed off the emotions and energies of fear and anger. They are adept at using hypnosis and mind control.

They are a very cunning aggressive reptilian species with the ability for trans-dimensional as well as Interdimensional travel. Many of them hire out as mercenaries to other beings. It appears that their sole agenda is to destroy the souls of humans, humanoid species throughout the universe.

LACERTIAN (Malevolent)

A species of aquatic reptilians from these have been described as lizard-like creatures 4- 6 feet tall, with gills, scales on various colors and are of the reptilian order. Some believe they were once depicted as ancient half fish/human gods of Syrian decent.

They are reported to possess telepathic abilities as well as the ability to place thoughts inside humans. They are supposedly from the constellation Lacerta, which extends from the head of the constellation Cepheus to the foot of the star system Perseus. Their ships have been described as either wormlike or triangular.

ORANGE (Unpredictable)

These entities refer to a 'human race with stalky yellow, red or orange hair, genetically-altered, humanoid-reptoid strain or hybrid. They are often described as having a humanoid form yet certain 'reptilian' genetic features. Some of the "Orange" allegedly have connections to Bernard's Star.

SUBTERRANEAN (Malevolent)

A species of Reptoids that is said to inhabit the subterranean areas of many planets. Historical texts claim they were earth's original inhabitants and that they were driven underground by rogue aliens called Terrans. There is a whole sub culture of

people who believe that they are from these reptilian/human bloodlines.

MOTHMEN

Largely subterranean, pterodactyl-like hominoids with bat-like wings. Sometimes describes as possessing 'horns' and thus are considered very similar to the traditional depiction of the 'devil', according to certain individuals who have encountered them. Very intelligent and extremely malignant. These creatures have also been referred to as the Ciakars, Pteroids, Birdmen and Winged.

VAMPIRIA (Unpredictable)

Species of reptilian that sustains its life force by siphoning off human energies and emotions. They are seven to nine feet tall with a raised hump between their eyes, elongated arms and legs, piercing eyes that are red with slits for pupils. Their bodies are reptile like bipedal and hands have four digits with dark talons. They are a hybrid species.

XINDI (Unpredictable)

This species actually belongs to the Avian civilizations. They were created to withstand the Reptoid infiltration and protect the avian civilizations. Over time they have evolved to war-like tendencies.

IGUANIDS (Saurians)

Approximately 4-5 feet tall, with 'Iguana-like' appearance yet 'hominoid' configuration. They have sometimes been seen wearing black, hooded 'monk' robes or cloaks which conceal much of their saurian features, which include tails.

These have been reported as being extremely dangerous and hateful towards humans and lesser-ranking Reptoids such as Greys, and like all other branches of the 'serpent' race they utilize black witchcraft, sorcery and other forms of mind control against their enemies. They appear to be a dimension-hopping sorcerer or priest class among the reptoid species.

SERPENT SPECIES

These are literally 'giant snakes' which have been encountered in various underground regions. They are often apparently used by the Draconians as 'sentries' to guard subterranean tunnels or 'treasure' repositories. They have been known to easily crush a human being or other objects with their teeth or their bodies.

SERPENTINE (Malevolent)

Reptilians that are snake like in appearance with yellow to red colored irises and elongated pupils. They have been reported as

being dark greenish gray, over several feet tall with viper shaped heads, long tails and snake like scales. They have snake like movements. Others have reported them to be giant snakes, larger than the Anaconda, and they are sentinels, guards that will capture or kill humans who get too close to discovering subterranean reptilian species.

LEVIATHANS

Sea saurian 'sea serpents' aquatic in nature and having lost the use of their limbs via atrophication and mutation, this branch of the "serpent race" is allegedly used for long-range 'psychic' warfare and occult manipulation of the human races.

NAGAS (Malevolent)

A member of a class of beings, half human and half cobra. They live in an underground kingdom called Naga-loka, or Patala-loka. Present in various parts of the globe – as the “Nagas” (“snakes”) in India, Amaru of South America, the Quetzalcoatl's (“Plumed Serpents”) in Mexico, the Djedhi (“snakes”) in Egypt, the Lung (“dragons”) in China or perhaps the Adders (“snakes”) in Britain – the Serpents of Wisdom were welcomed by the indigenous people and worshipped as “Serpent prophets”.

They are a strong, handsome species who can assume either wholly human or wholly serpentine form and are potentially dangerous but often beneficial to humans. They play a significant role in the legends of India and Tibet where they are considered by some to be demoniacal residents of a subterranean realm. They are described as being around 8-10 ft. tall and of various colors, grotesque, but most often moldy greenish with scaled crocodilian 'skin'.

SAURIANS (MALEVOLENT) BURROWERS

A mutation of the saurian or serpent race that is capable of burrowing through soils. Possibly quadrupedal as well as bi-pedal, these have been known to use their natural 'boring' abilities to create artificial tunnels like moles, or even spontaneously produced 'cave-ins' (the latter has allegedly been used in attempts to entrap or kill unsuspecting intruders into the underground domains). These may possess a highly-developed 'bio-sensing' system.
